Probable Cause

On April 19, 2022, at approximately 8:35 pm, I was dispatched to a motor vehicle collision on State Road 91 northbound mile marker 74 that involved three-vehicles a white Tesla, a black Tesla and a white Ram pickup truck with a car carrier trailer. On the scene, I met with the driver of the black Tesla car who advised me that he was hit by a white Tesla while traveling in the left lane.

I later located the driver of the white Tesla sitting behind the steering wheel and its front airbag deployed. I identified the driver of the white Tesla as Barry Peskin by his Florida Driver License (P250064611020). I did not smell any alcoholic beverages emitting from Peskin's breathe; however, his face looked very pale, his eyes were bloodshot water/ glassy. I observed him having difficulty standing (swaying) while on a leveled surface. After assisting Trooper James with his crash investigation, I changed Hat at 10:05 pm and advised Peskin that I will be conducting a criminal investigation regarding DUI.

Prior to administering a DUI, I interviewed three independent witnesses on video:

The first on was Nelson Pioviet who advised me that the white Tesla passed them when they were coming out of the rest area in Broward County, Florida. The Tesla almost hit their driver's side front fender only to continue in the left lane and center

lane swerving from left to right before causing the traffic crash ahead. Piovett identified the driver as white Tesla as being a male between the age 65-70 with white or silver hair.

Ms. Leticia Castillo Rodriguez was in the same car with Piovett as a front seat passenger and she confirmed Piovett's observations regarding the white Tesla driving patterns.

Prior to beginning the exercise, it was determined that Peskin was not wearing contact lenses. Peskin's eyes were checked, and his eyes displayed equal tracking and his pupils were equal size. Peskin was instructed to follow the stimulus with his eyes only, keeping his head still. After stating he understood the instructions Peskin attempted the exercise.

The results of this exercise displayed 6 of the 6 possible clues.

- A lack of Smooth Pursuit in his left eye.
- A lack of Smooth Pursuit in his right eye.
- A distinct and sustained nystagmus in the left eye at maximum deviation.
- A distinct and sustained nystagmus in the right eye at maximum deviation.
- An onset of nystagmus in the left eye prior to 45 degrees.
- An onset of nystagmus in the right eye prior to 45 degrees.
- The exercise further revealed the presence of vertical nystagmus. Vertical nystagmus is an indicator of high doses of alcohol, other central nervous systems (CNS) depressants or inhalants, and the consumption of the drug phencyclidine (PCP).

While performing the Horizontal Gaze Nystagmus exercise, Peskin was constantly swaying while standing.

Prior to attempting Walk and Turn Exercise, Peskin indicated he did not have any medical conditions that would have prevented him from performing the exercise. I instructed Peskin to put his left foot on the painted solid white lane marker and his

right foot in front of his left foot with his right heel touching the toe of his left foot. I instructed him to stand in a prescribed manner with his hands by his sides until the exercise instructions were completed and the exercise demonstrated. I instructed Peskin not to begin the exercise until he was told to do so. I instructed Peskin to take nine steps along the line in a heel-to-toe manner. After the ninth step, he was to stop and turn around keeping his lead foot on the ground, taking several small steps with the other foot to turn around. After turning around, he was to take nine steps in a heel-to-toe manner back along the line, in the direction he had come from. I further instructed him to watch his feet always while walking, keeping his arms down to his sides, and to count his steps out aloud. After the exercise was demonstrated, Peskin stated he understood the instructions; as a result, I instructed Peskin to begin the exercise.

Walk and Turn exercise observations:

- On the first set of steps, Peskin failed to walk in a heel-to-toe manner on all steps, failing to walk heel-to-toe on steps 1, 2, 3, 4, 5, 6, 7, 8, and 9.
- On the second set of steps, Peskin failed to walk in a heel-to-toe manner on all steps, failing to walk heel-to-toe on steps 1, 2, 3, 4, 5, 6, 7, 8, and 9.
- Was unable to stand in a heel-to-toe manner while the instructions to the exercise were given.
- Did not look down and watch his feet during the exercise.
- Raised arms for balance during the exercise.
- Lost his balance while walking.
- Turned incorrectly.
- Failed to count his steps out loud.
- Took the incorrect number of steps on the first set of 9 steps (11)
- Took the incorrect number of steps on the second set of 9 steps (23)
- Did not look down and watch his feet during the exercise.
- Stopped while walking.

content to which he agreed. Palm Beach County Jail breathe test operator then administered the breath test in the DUI room at the jail. Peskin's breath samples results were inconsistent with his roadside field sobriety exercises; as a result, I requested a urine sample from Peskin, and he provided a sample at approximately 12:05 am.

All roadside exercises were captured on FHP0426 In-car Dash-cameras.

The above incident occurred within the jurisdictional limits of Palm Beach County and the State of Florida.
