I got between the vehicles and began following the Volkswagen as it turned south onto S A1A.</p> <p>I observed the Volkswagen appeared to be traveling above the posted 30 MPH speed limit and estimated the vehicle's speed to be approximately 45 MPH. I activated the front antenna of my Stalker DSR2X, vehicle-mounted, radar unit in moving mode and received a digital speed readout of 45 MPH. My radar unit emitted a clear, constant audio Doppler tone consistent with a vehicle traveling the aforementioned speed. I continued following the Volkswagen south on S A1A and observed it varying its speed between 35 MPH and 45 MPH.</p>

Just south of Carlin Park (400 S AlA), the roadway curves to the right. While negotiating the curve, I observed both passenger side tires of the Volkswagen cross over the solid white fog line separating the southbound lane of S AlA from the bicycle lane. The vehicle almost struck the curb on the west side of the road as it negotiated the curve.

I activated my overhead interior lights and siren to conduct a traffic stop and the vehicle was somewhat slow to respond to my signal to stop. The vehicle ultimately pulled into a parallel parking space and stopped.

I approached the vehicle on the driver side and made contact with the driver and sole occupant of the vehicle, identified by her valid Class E Florida driver license to be Lily Rinker (w/f; 03/17/2000). I observed Rinker had extremely dilated pupils and spoke very deliberately. I could smell the odor of an unknown alcoholic beverage coming from Rinker's breath which intensified as she spoke. I requested Rinker provide her license, registration, and proof of insurance for the vehicle. Rinker provided her driver license and failed to resume her search for the other requested documentation. I again requested Rinker produce her registration and insurance. Rinker removed the registration from the glove compartment, handed it to me, then closed her glove compartment again failing to resume her search. I asked a third time for her insurance information and Rinker provided it to me.

Rinker advised she did not take any medications, did not have any medical issues, and was not injured in any way. I asked Rinker to estimate her level of impairment on a scale of 1 (being sober) to 10 (being sick) and she advised she was fine to driver, never providing a number. Rinker advised she was traveling on Jupiter Beach Rd. and was traveling back to her residence. Rinker advised she lived in Jupiter and initially would not provide her specific address. It should be noted that from the time the call came out to the time Rinker was stopped, she had passed her neighborhood and was traveling in some arbitrary direction, away from her residence.

I requested Rinker exit her vehicle and she complied. Rinker turned her vehicle off, opened the door, and appeared to be having difficulty removing the key from her ignition. After several moments, Rinker realized her vehicle was still in drive so she put the car in park and removed her keys. Rinker exited the vehicle and appeared to stumble to the rear, wedging herself between her open driver door and the A pillar of the vehicle briefly. I requested Rinker walk to the front of my patrol car and observed she was unsteady on her feet, unable to walk in a straight line.

I expressed my concern to Rinker that I believed she was under the influence and requested she perform Standardized Field Sobriety Tasks (SFSTs). Rinker agreed.

<p>I first conducted the Horizontal Gaze Nystagmus task. I am a certified Drug Recognition Expert (IACP # 32395) and I conducted this task in accordance my training. I observed Rinker's pupils appeared to be of equal approximate size (although extremely dilated), she did not have resting nystagmus, and was able to equally track a moving stimulus. I observed Lack of Smooth Pursuit and Distinct and Sustained Nystagmus at Maximum Deviation in both eyes. Rinker had trouble following instructions and continually moved her head in the direction of the stimulus. I was unable to observe the Onset of Nystagmus prior to 45 Degrees. Vertical Gaze Nystagmus was not present.</p> <p>I then conducted the Walk and Turn. Rinker started the task before instructed and lost her balance (taking her front foot off the line) each, once. When advised to begin, Rinker missed heel-to-toe on steps 2, 4, and 5. Rinker used her arms to balance on step 3. Rinker stepped off the line (to the right) on steps 3 and 4. Rinker took a total of 8 steps. Rinker did not turn around, but rather began walking backwards, and took a total of 9 backwards steps. I did not look for clues on the backwards walk, as it was not part of my instructions and was inconsistent with the manner in which I explained and demonstrated the task.</p> <p>I next conducted the One Leg Stand task. This task was conducted twice, as Rinker advised partway through her first attempt that she was taking the medication Zoloft. She advised she takes a 100 mg pill every morning. I then gave the instructions for the One Leg Stand again. When told to begin, Rinker raised her right leg off the ground. Rinker used her arms to balance on her count of 8, swayed, then placed her foot down on her count of 9. Rinker then restarted her count from 1 and placed her foot on the ground almost immediately. At the end of a timed 30 second period, I terminated the task.</p> <p>Before conducting the Finger to Nose, Rinker demonstrated knowledge of her left and right hands. When told to begin, I reminded Rinker to tilt her head back and close her eyes. The cadence for this task was: Left, Right, Left, Right, Right, Left. On the first call of left, Rinker touched the pad of her left index finger to the tip of her nose and failed to return to her hand to her side. On all other calls of the task, Rinker touched the pad of the appropriate finger to the tip of her nose.</p> <p>Finally, I conducted the Romberg Alphabet. When told to begin, Rinker appropriately tilted her head back and closed her eyes. Rinker began the alphabet "ABZD..." but appropriately recited the alphabet. Rinker did not recite the alphabet in a non-rhythmic manner and grouped letters together, as if she was singing - without actually singing.</p> <p>Based on the totality of the circumstances, I placed Rinker under arrest for DUI. Upon a search incident to arrest of Rinker's vehicle, I located a prescription pill bottle in her purse (on the front passenger seat) for the medication Lorazepam. The prescription was in Rinker's name, was filled on 08/03/2021, and had a total of 17 pills remaining inside the bottle.</p>

I asked Rinker to estimate her level of impairment on a scale of 1 (being sober) to 10 (being sick) and she advised she was fine to driver, never providing a number. Rinker advised she was traveling on Jupiter Beach Rd. and was traveling back to her residence. Rinker advised she lived in Jupiter and initially would not provide her specific address. It should be noted that from the time the call came out to the time Rinker was stopped, she had passed her neighborhood and was traveling in some arbitrary direction, away from her residence.</p> <p>I requested Rinker exit her vehicle and she complied. Rinker turned her vehicle off, opened the door, and appeared to be having difficulty removing the key from her ignition. After several moments, Rinker realized her vehicle was still in drive so she put the car in park and removed her keys. Rinker exited the vehicle and appeared to stumble to the rear, wedging herself between her open driver door and the A pillar of the vehicle briefly. I requested Rinker walk to the front of my patrol car and observed she was unsteady on her feet, unable to walk in a straight line.</p> <p>I expressed my concern to Rinker that I believed she was under the influence and requested she perform Standardized Field Sobriety Tasks (SFSTs). Rinker agreed.</p>

I first conducted the Horizontal Gaze Nystagmus task. I am a certified Drug Recognition Expert (IACP # 32395) and I conducted this task in accordance my training. I observed Rinker's pupils appeared to be of equal approximate size (although extremely dilated), she did not have resting nystagmus, and was able to equally track a moving stimulus. I observed Lack of Smooth Pursuit and Distinct and Sustained Nystagmus at Maximum Deviation in both eyes. Rinker had trouble following instructions and continually moved her head in the direction of the stimulus. I was unable to observe the Onset of Nystagmus prior to 45 Degrees. Vertical Gaze Nystagmus was not present.

I then conducted the Walk and Turn. Rinker started the task before instructed and lost her balance (taking her front foot off the line) each, once. When advised to begin, Rinker missed heel-to-toe on steps 2, 4, and 5. Rinker used her arms to balance on step 3. Rinker stepped off the line (to the right) on steps 3 and 4. Rinker took a total of 8 steps. Rinker did not turn around, but rather began walking backwards, and took a total of 9 backwards steps. I did not look for clues on the backwards walk, as it was not part of my instructions and was inconsistent with the manner in which I explained and demonstrated the task.

I next conducted the One Leg Stand task. This task was conducted twice, as Rinker advised partway through her first attempt that she was taking the medication Zoloft. She advised she takes a 100 mg pill every morning. I then gave the instructions for the One Leg Stand again. When told to begin, Rinker raised her right leg off the ground. Rinker used her arms to balance on her count of 8, swayed, then placed her foot down on her count of 9. Rinker then restarted her count from 1 and placed her foot on the ground almost immediately. At the end of a timed 30 second period, I terminated the task.

Before conducting the Finger to Nose, Rinker demonstrated knowledge of her left and right hands. When told to begin, I reminded Rinker to tilt her head back and close her eyes. The cadence for this task was: Left, Right, Left, Right, Right, Left. On the first call of left, Rinker touched the pad of her left index finger to the tip of her nose and failed to return to her hand to her side. On all other calls of the task, Rinker touched the pad of the appropriate finger to the tip of her nose.

Finally, I conducted the Romberg Alphabet. When told to begin, Rinker appropriately tilted her head back and closed her eyes. Rinker began the alphabet "ABZD..." but appropriately recited the alphabet. Rinker did not recite the alphabet in a non-rhythmic manner and grouped letters together, as if she was singing - without actually singing.

Based on the totality of the circumstances, I placed Rinker under arrest for DUI. Upon a search incident to arrest of Rinker's vehicle, I located a prescription pill bottle in her purse (on the front passenger seat) for the medication Lorazepam. The prescription was in Rinker's name, was filled on 08/03/2021, and had a total of 17 pills remaining inside the bottle.
