Kailey had difficulty straight and would lean while she walked

Other Observations:

Once positioned in the front of my vehicle, I continued my investigation. I instructed Kailey to keep her hands by their side, stand with her feet together, and follow a red light stimulus with her eyes not turning her head. I asked her if she understood my instructions. Kailey verbally stated she understood my instructions. Kailey however swayed while standing stationary. I observed both eyes to be red, bloodshot, and glossy. Her left and right eye displayed equal pupil size, equal tracking, and a lack of smooth pursuit. I observed distinct and sustained nystagmus was present in both her left and right eye at maximum deviation during two separate four second evaluations. The onset of nystagmus was prior to a 45 degree angle in both her left and right eye during two separate four second evaluations. Vertical nystagmus was not present in both the left and right eye during two separate four second evaluations. While conducting the task I had to remind her to keep hands by her side, not turn her head and follow the stimulus multiple times.

WALK & TURN:

I positioned Kailey on a painted yellow line which was on a visually smooth and visually level surface, free of any debris and well lit by the headlights on my vehicle and nearby street lighting. I instructed the driver to place her left foot on the line and her right foot in front of the left touching heel to toe. I instructed her that she was to keep her hands at her side and stay in this position until I instructed her to do otherwise. I instructed her to walk nine heel to toe steps counting out loud, while watching her feet. On the ninth step she was to keep her front foot on the line and use her back foot, in a series of small steps, to turn around before walking nine heel to toe steps the opposite direction counting out loud and watching her feet. I demonstrated the task while I was verbally instructing her in the proper way to complete the task. During the task, I observed the driver swayed while balancing, did not touch heel to toe, stepped off the line. Used arms to maintain balance (+6"), did not turn properly. Incorrect number of steps.

ONE LEG STAND:

I placed Kailey with her feet together and arms at her side. I demonstrated the task as I verbally instructed her to raise one of her feet approximately six inches off of the ground, point her toe towards my patrol car, look at the raised foot, and count out loud 1001, 1002, 1003 and so on until told to stop. I asked her if she understood the instructions and demonstration I provided. After Kailey stated she understood my instructions, the task was performed. While Kailey stood in the instructional position, I observed swayed while standing stationary. While raising her foot she swayed while balancing, put foot down (within 30 seconds).

FINGER TO NOSE:

I instructed Kailey to stand with her feet together, make each hand into a fist keeping, extended her index fingers and to place her palms facing up. She was instructed to lower their arms by their side. I instructed and demonstrated the proper hand and arm position and for him/her to remain in this position while I demonstrated the rest of the task. I instructed and demonstrated her to tilt her head back approximately 45 degrees and close their eyes while waiting for a verbal command of left or right. On the command of "left" or "right", she would raise the requested hand, touch the tip of her finger to the tip of her nose, then bring their hand immediately back down to her side. During the instruction and demonstration of the she swayed while standing in the instructional position. I asked her if she understood the instructions I provided and she verbally stated she understood. I instructed her to start the task as explained. During the task, I observed the driver did not keep eyes closed, failed to return arms to side, correct finger did not touch tip of nose, used wrong hand.

ROMBERG ALPHABET:

I verbally inquired if Kailey could recite the entire English alphabet. She stated she was able to recite the English alphabet and I instructed her to place their feet together with her arms at their side and stay in this position until told to do otherwise. I instructed her that upon starting she was to tilt her head back approximately 45 degrees and close their eyes. She would begin to state the alphabet in a slow and methodical manner without singing or rhyming it. I asked her if she understood the instructions and she verbally replied she understood. During the instructions she continued to sway while standing stationary. I instructed Kailey to start the task as explained. During the task, I observed the driver did not keep eyes closed, swayed more than (+2") from side to side, from front to back.
