# D.U.I. PROBABLE CAUSE AFFIDAVIT

ON THE 24th DAY OF December 20 22, AT 04:01 ✓ AM PM

SUBJECT: Arteaga, Liliana, CASE NUMBER: 22-142969

AGENCY: PALM BEACH COUNTY SHERIFF'S OFFICE ARRESTING OFFICER: D/S U. RAZI # 40962

## PERSONAL CONTACT

DRIVING PATTERN: Actual physical control (physical evidence or statements putting def. behind wheel of vehicle)

*See Sgt. Soloway #8586 probable cause supplement*

"On 12/24/22 at approximately 0400 hours I observed a red Chevy SUV traveling eastbound in the 6500 block of Gateway Blvd. The vehicle had what appeared to be fresh damage to the right front bumper and there was something being dragged under the vehicle. I positioned my marked PBSO vehicle behind the suspect vehicle. The vehicle was bearing FL tag NGSU68. As the vehicle continued eastbound it stopped in the middle of the roadway for and unknown reason. The vehicle swerved outside both the left and right lane marker multiple times. At one point, the vehicle was traveling in two lanes. I was concerned the driver was having a vehicle malfunction, the driver was having a medical episode, or the driver was impaired. I conducted a traffic stop on the vehicle in the area of Gateway Blvd/ Lawrence Rd. The vehicle slowed but did not promptly come to a stop.

I made contact with the driver and sole occupant who identified herself by her FL DL as Liliana Arteaga. In speaking with the driver I observed her eyes to be red and glassy. Her speech was slow and slurred. There was an obvious odor of an unknown alcoholic beverage coming from her breath. This odor intensified as she spoke. She stated she was coming from a friend's house and was heading home. She stated she drank 2 beers tonight. She did not know the name of the road she was traveling on. She stated she was traveling northbound, she was actually traveling eastbound.

Cpl. Gonzalez and D/S Razi responded and conducted a DUI investigation. "

OBSERVATION OF DRIVER:

**I observed that Liliana Arteaga was wearing Grey shirt and Blue pants. I observed Liliana eyes appeared red and glassy. I observed that she was slurring her words. Liliana was asked to exit the vehicle to perform field sobriety tasks and she agreed. While exiting the vehicle, Liliana appeared to be shaky on her feet. Liliana had difficulty walking and standing still and repeatedly stated that she could not hold her pee and that she needed to use the restroom.**

DRIVER'S STATEMENTS:

**I asked if the Liliana had been drinking or used any drugs. She stated yes and that she had two bud light drafts. I asked the driver what medical problems and/or previous injuries they had. She stated she did not have any. I asked what medications they take. She stated she does not take any.**

ODORS:

**Obvious odor of an unknown alcoholic beverage**

## GENERAL OBSERVATIONS

SPEECH: **slurred and slow**

ATTITUDE: **calm, compliant, upset, angry, and crying**

CLOTHING: **wearing grey shirt and blue jeans**

## ROADSIDE TASKS

### HORIZONTAL GAZE NYSTAGMUS:

- [x] LT EYE-LACK OF SMOOTH PURSUIT
- [x] RT EYE-LACK OF SMOOTH PURSUIT
- [x] LT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION
- [x] RT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION
- [x] LT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES
- [x] RT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES

### Other Observations:

Once positioned in the front of my vehicle, I continued my investigation. I instructed Liliana to keep her hands by their side, stand with her feet together, and follow a red light stimulus with her eyes not turning her head. I asked her if she understood my instructions. Liliana verbally stated she understood my instructions. Liliana however swayed while standing stationary. I observed both eyes to be red, bloodshot, and glossy. Her left and right eye displayed equal pupil size, equal tracking, and a lack of smooth pursuit. I observed distinct and sustained nystagmus was present in both her left and right eye at maximum deviation during two separate four second evaluations. The onset of nystagmus was prior to a 45 degree angle in both her left and right eye during two separate four second evaluations. While conducting the task I had to remind her to not turn her head and follow the stimulus multiple times.

### WALK & TURN:

**I positioned Liliana on a painted yellow line which was on a visually smooth and visually level surface, free of any debris and well lit by the headlights on my vehicle and nearby street lighting. I instructed Liliana to place her left foot on the line and her right foot in front of the left touching heel to toe. I instructed her that she was to keep her hands at her side and stay in this position until I instructed her to do otherwise. I instructed her to walk nine heel to toe steps counting out loud, while watching her feet. On the ninth step she was to keep her front foot on the line and use her back foot, in a series of small steps, to turn around before walking nine heel to toe steps the opposite direction counting out loud and watching her feet. I demonstrated the task while I was verbally instructing her in the proper way to complete the task. During the task, I observed the driver swayed while balancing, stops walking to steady self, did not touch heel to toe, stepped off the line 3 times, used arms to maintain balance (+6"), did not turn properly (turns other way than I explained.), and incorrect number of steps.**

### ONE LEG STAND:

**I placed Liliana with her feet together and arms at her side. I demonstrated the task as I verbally instructed her to raise one of her feet approximately six inches off of the ground, point her toe towards my patrol car, look at the raised foot, and count out loud 1001, 1002, 1003 and so on until told to stop. I asked her if she understood the instructions and demonstration I provided. After Liliana stated she understood my instructions, the task was performed. While Liliana stood in the instructional position, I observed she swayed while standing stationary. While raising her foot she swayed while balancing, hopped, put foot down (within 3 seconds), and then advised that she could not do the task.**

### FINGER TO NOSE:

I instructed Liliana to stand with her feet together, make each hand into a fist keeping, extended her index fingers and to place her palms facing up. She was instructed to lower their arms by their side. I instructed and demonstrated the proper hand and arm position and for her to remain in this position while I demonstrated the rest of the task. I instructed and demonstrated her to tilt her head back approximately 45 degrees and close their eyes while waiting for a verbal command of left or right. On the command of "left" or "right", she would raise the requested hand, touch the tip of her finger to the tip of her nose, then bring their hand immediately back down to her side. During the instruction and demonstration of the task she swayed heavily while standing in the instructional position. I asked her if she understood the instructions I provided and she verbally stated she understood. I instructed her to start the task as explained. During the task, I observed the driver did not keep eyes closed, failed to return arms to side, correct finger did not touch tip of nose, and used wrong hand.

### ROMBERG ALPHABET:

I verbally inquired if Liliana could recite the entire English alphabet. She stated she was able to recite the English alphabet and I instructed her to place their feet together with her arms at their side and stay in this position until told to do otherwise. I instructed her that upon starting she was to tilt her head back approximately 45 degrees and close their eyes. I instructed her that when I advised to begin to state the alphabet in a slow and methodical manner without singing or rhyming it. I asked her if she understood the instructions and she verbally replied she understood. During the instructions she continued to sway while standing stationary. I instructed Liliana to start the task as explained. During the task, I observed the driver did not keep eyes closed, swayed more than (+2") from side to side, from front to back, used arms for balancing (more than 6').
