PROBABLE CAUSE STATEMENT

The undersigned certifies and swears that he/she has just and resonable grounds to believe, and does believe that the above named Defendant committed the following violation of law.

The Person taken into custody . . .

☒ committed the below acts in my presence.

☐ confessed to _____ admitting to the below facts.

☐ was observed by _____ who told _____ that he/she saw the arrested person committ the below acts.

☒ was found to have committed the below acts, resulting from my (described) investigation.

On the 17 day of May, 2023 at 22:57 (Specifically include facts constituting cause for arrest.)

On 05/17/2023 at approximately 2234 hours, I was conducting routine patrols on S.R. 811 (S Alternate A1A) in the area of S.R. 706 (E Indiantown Rd.) in the Town of Jupiter, Palm Beach County, Florida. At the time, I was driving an unmarked Jupiter Police Department patrol vehicle (vehicle 2109), I was wearing a JPD uniform clearly identifying myself as a Jupiter Police Officer, and I was wearing my department-issued Axon body camera.

At the time, I was driving southbound in the center lane of S.R. 811 approaching the intersection with Toney Penna Dr. I observed a silver Chevrolet SUV bearing FL tag # PKLG19 also traveling southbound (in the outside lane) in front of me. Before the intersection, I observed the Chevrolet drift out of the southbound lane (to the right) and over the solid white fog line separating the outside southbound lane from the bicycle lane of the roadway. The Chevrolet continued southbound for approximately 200 feet with both passenger side tires in the bicycle lane before it re-entered the outside lane, but drifted all the way to the inside of the lane, touching the dashed lane dividers with both driver side tires.

I continued to follow the vehicle and observed it continue this repetitive pattern of weaving from the inside to outside extremes of the outside southbound lane until it approached the Three Palms Plaza (a distance of approximately 1 mile) where it again crossed over the solid white fog line, into the bicycle lane.

I called in the traffic stop and activated my overhead interior lights and siren to conduct a traffic stop on the vehicle. The driver of the Chevrolet hit the brakes and slowed to approximately 40 MPH in a posted 50 MPH speed zone and continued southbound in the outside lane. I continued behind the vehicle and re-activated my siren to signal the driver to pull over. The driver continued southbound past the intersection with Admiral`s Cove Blvd. and finally pulled off onto the grass shoulder of the roadway. In

PROBABLE CAUSE STATEMENT

all, I was behind the vehicle for almost one full minute with my lights/siren on before the driver finally stopped. It should be noted that the entire southbound shoulder of the roadway is grass from the area where I initiated the traffic stop and the driver could have pulled over into the grass at any point but did not.

When the vehicle finally stopped, I approached on the driver side and made contact with the driver and sole-occupant of the vehicle. I advised him of the reason for the stop and immediately noted his eyes were bloodshot and glassy and he had a flushed face. I asked where the driver was coming from and he advised "Jupiter". I asked him to clarify and he stated he was coming from the Jupiter Beach Resort. I also noted immediately that the driver had slurred speech and I could smell the strong odor of an unknown alcoholic beverage on his breath which intensified as he spoke. The driver advised he had consumed 2 drinks prior to leaving the Jupiter Beach Resort and made sure to tell me two separate times in quick succession that he lives right down the street. The driver provided me with his valid Class E Florida driver`s license without me having to ask for it and I identified him to be Jules Johnson (w/m; 09/24/1968).

I requested Johnson produce his registration and insurance information for the vehicle and he provided me with the registration from the glove compartment almost immediately but then forgot to produce his insurance information. I asked again for the insurance information and Johnson removed an expired insurance card from his wallet and provided it to me. I advised Johnson the card he provided was expired and he removed another card which was valid and provided that to me as well.

I asked Johnson if he takes any medications and he answered "probably", smiled at me, and chuckled. I was confused by his answer, as almost anyone I ask that question to provides either a yes/no answer so I asked him to clarify and he completely changed the subject, advising me that he was having issues with his family life at home.

I asked Johnson to estimate his own level of impairment on a scale of 1 (being sober) to 10 (feeling sick) and he stated he was a "nine". I questioned Johnson`s answer, as a 9 is an extremely high number, and Johnson asked me to repeat the question. I repeated the question, Johnson advised he originally misunderstood, and replied now that he was a "two". When I asked if Johnson could feel the effects of the alcohol he replied "a little bit" but when I asked if he could feel the effects of the alcohol Johnson changed the subject and again told me that he lives right down the street (now the fourth time since I spoke to him giving me the impression he was attempting to downplay the incident and provide a case that he was almost to his house).

Johnson then advised he has vocal chord paralysis but stated "paralalysis" the first time he said it. Based upon my observations of his driving pattern and my observations during the personal contact phase of the investigation, I asked Johnson to exit the vehicle. Johnson complied. I directed Johnson to the grass shoulder of the roadway and

asked him to perform Standardized Field Sobriety Tasks. As I did, Johnson swayed heavily towards me and I outstretched my hand to stabilize him from falling down. Johnson again advised me that he lives right down the road and that he can walk home but I advised him that was not an option for him, as I needed to complete my duty as a Law Enforcement Officer. Johnson advised he was willing to perform roadside tasks.

Johnson advised he has Asthma which he treats with an albuterol inhaler and the drug Proventil.

I first conducted the Horizontal Gaze Nystagmus task. I am a certified Drug Recognition Expert (IACP # 32395) and I conducted this task in accordance with my training. Johnson had pupils of equal approximate size, he did not have resting nystagmus, and he was able to equally track a moving stimulus. I observed Lack of Smooth Pursuit, Distinct and Sustained Nystagmus at Maximum Deviation, and the Onset of Nystagmus prior to 45 Degrees in both Johnson`s eyes. I did not observe Vertical Gaze Nystagmus. While conducting this task, I reminded Johnson to keep his eyes on the stimulus as he would look at some unknown point behind me between my stimulus and my head while I was performing the task. Johnson was also swaying from front to back.

I next conducted the Walk and Turn. Johnson removed his sandals before this task. Johnson had difficulty understanding to stand in the starting position and not walk until instructed. Johnson would place his left foot on the line, right foot in front of his left, then immediately start walking before being told. Johnson also complained that the task was difficult to perform "on a good day". I advised Johnson the task is very simple and that as adults, we generally do not have much difficulty walking. Johnson eventually got in the proper starting position and remained in it while I provided the instructions. When told to begin, Johnson missed heel to toe on steps 3-9. Johnson used his arms to balance on steps 4-9, holding them completely out to his sides like an airplane. Johnson took a total of 12 steps down the line before turning. Johnson turned improperly by pivoting on the balls of both his feet. Johnson then began walking back down the line, missing heel-to-toe on every step (walking at an approximately normal-length stride) with his arms again outstretched like an airplane. Johnson stepped off the line (to the left) on step 7. Johnson again took 12 steps down the line.

I then conducted the One Leg Stand task. I provided the instructions to Johnson and he originally advised he understood. I advised him to start and Johnson raised his right leg off the ground. Johnson almost immediately swayed to his right, raised both arms from his sides (like an airplane again), and placed his foot on the ground. Johnson then asked me how to perform the task and requested I give him the instructions again, so I did. On his second attempt, Johnson again raised his right leg off the ground, swayed to his left, outstretched his arms completely to his sides, and took a short hop to his left. After approximately 2 seconds, Johnson placed his foot on the ground. Johnson continued this pattern of raising his leg off the ground but being unable to maintain

PROBABLE CAUSE STATEMENT

his balance throughout the entirety of the task. Additionally, I reminded Johnson to continue until I told him to stop twice and Johnson never counted out loud, as instructed. When 30 seconds had elapsed, I terminated the task.

Before conducting the Finger to Nose task, Johnson demonstrated knowledge of his left and right hands. When told to begin, Johnson tilted his head back but I had to remind him to close his eyes. The cadence for this task was: Left, Right, Left, Right, Right, Left. On the first call of left, Johnson asked what I wanted him to do. I advised him to complete the task as I had instructed and Johnson smashed the tip of his left finger to the tip of his nose (compressing his nose to his face) failing to return his arm immediately to his side until I reminded him. On the first call of right, Johnson appropriately touched finger-to-nose and again failed to immediately return his arm to his side, although he did bring it down on his own. On the second call of left, Johnson touched the pad of his left finger to the tip of his nose. On the second call of right, Johnson began raising his right arm from his side before I gave the command but appropriately touched finger-to-nose. On the final call of right, Johnson touched the tip of his LEFT finger to the tip of his nose, brought his arm back down to his side, then raised his right hand and touched the tip of his finger to the tip of his nose. On the final call of left, Johnson touched the pad of his left finger to the tip of his nose.

Before conducting the Romberg Alphabet, Johnson advised his highest level of education was a Bachelor`s degree and that he was comfortable with the alphabet from A to Z. Johnson then apologized for his raspy voice and advised me that the backup officers on scene were looking at him like he was "a fricking nut-job". I reassured Johnson that nobody was there judging him and that the officers were watching me. Johnson then commended me on the fine job I was doing as I was giving him the instructions. Johnson tilted his head back and closed his eyes while I was giving the instructions to him, before I advised him to start. I advised him not to start until I told him to. Johnson then told me I was doing a great job, talking over me as I was giving him the instructions. Despite this, Johnson advised he understood the instructions, appropriately tilted his head back and closed his eyes when I instructed him to, and recited the alphabet correctly with the exception of the letter "T", which he replaced with a "D".

Based on my observations, I placed Johnson under arrest for DUI. I requested at roadside Johnson provide a lawful sample of his breath for the purpose of determining the alcohol content. Johnson responded "this is bullshit". Based upon his answer, I read Implied Consent from a prepared text, confirmed Johnson understood, and again requested he provide a breath sample. Johnson refused at 2304 hours. Based on the aforementioned facts resulting from my investigation, I find Probable Cause exists to charge Jules Johnson with DUI - Normal Faculties Impaired pursuant to FSS 316.193(1)(a).
