Probable Cause

On January 23, 2026, at approximately 11:53 P.M., I (Trooper Lafleur ID#5261), was on routine patrol in my fully marked patrol vehicle (FHP3475 Vin # 2C3CDXAT0PH639153) with a speedometer calibration date of 11/14/25 and identifiable Florida Highway Patrol painted insignias. I was traveling northbound on Interstate 95 (State Road 9) south of Hypoluxo Road in the inside center lane of travel. I observed a white Volvo Sports Utility Vehicle (SUV) bearing a specialty Florida license plate of FFL240 traveling in the inside center lane of travel at a high rate of speed and swerving within their travel lane. I activated my in-car dash camera to document the incident. I began to follow the vehicle from a safe distance to observe the driving patterns. I paced clocked the vehicle for approximately a quarter of a mile at a speed of 105 miles per hour in a 65 miles per hour zone. While traveling northbound north of lantana road the driver of the vehicle continued to swerve within its lane of travel. The driver of the vehicle drifted to the right multiple times and the right tires of the vehicle crossed the dashed white line that separated the inside center lane from the center lane of travel. A short time later, the driver of the vehicle drifted to the left, and the left tires of the vehicle crossed the dashed white line that separated the inside center lane of travel from the inside lane of travel and almost collided with a black passenger vehicle that was traveling in the inside lane of travel. A few seconds later, the driver changes from the inside center lane of travel to the inside lane of travel. The driver of the vehicle continued travelling northbound at a high rate of speed while swerving within its lane of travel. The driver drifted to the right multiple times and the right tires of the vehicle crossed the dashed white line that separated the inside lane from the inside center lane. The driver of the vehicle also drifted to the left multiple times as well and the left tires of the vehicle crossed the solid white line that separated the inside lane from the inside paved emergency shoulder. I paced clocked the driver for a second time for approximately three to five miles at a speed of 92 miles per hour in a 65 miles per hour zone. A short time later, the driver of the vehicle changes from the inside lane of travel to the outside lane of travel. The vehicle took the exit ramp to State Road 882 (Forest Hill Boulevard) and made a left-hand turn at the light. The vehicle continued westbound on State Road 882 (Forest Hill Boulevard). A few seconds later, I accelerated to get closer to the vehicle. I activated my emergency blue lights and sirens to conduct a traffic stop on the vehicle for the violation of unlawful speed and also a welfare check. I did not know if the driver was potentially suffering from a medical emergency or might be impaired due to alcohol or an unknown substance.

Upon activating my emergency blue lights and sirens, the driver of the vehicle came to a complete stop westbound on State Road 882 (Forest Hill Boulevard) and Shore Drive. Once the vehicle came to a complete stop, I approached the driver side of the vehicle to make contact with the driver of the vehicle who was later identified by her Florida driver's license card (L387695780000) as KAREN L LANE with a

NOT A CERTIFIED COPY

date of birth of 11/13/1953. She was the sole occupant of the vehicle.

Upon making contact with Ms. Lane, I introduced myself and advised her of the reason for the stop. I asked her if she was experiencing any major medical issues, to which she replied she was not. I then requested her driver's license and further explained the reason for the stop to the driver. While interacting with Ms. Lane, I observed multiple signs of impairment such as slurred speech, bloodshot eyes and a strong odor of an unknown alcoholic beverage emitting from his breath that grew stronger each time she spoke. I requested Ms. Lane to exit the vehicle, and she cooperated. While standing outside of the vehicle and interacting with Ms. Lane, I still smelled the strong odor of an unknown alcoholic beverage emitting from her breath that grew stronger each time she spoke. Ms. Lane' speech was slow, and slurred. Ms. Lane' mannerisms were distinct and consistent with someone who might be under the influence of alcohol or an unknown substance. I asked her if she had consumed any alcoholic beverages today and she stated she had three classes of wine approximately two hours at a restaurant. When I questioned her regarding his travel plans, Ms. Lane advised me that she was coming from Lantana a short time later she advised she was coming from Fort Lauderdale, and she was heading home. While interacting with her outside of the vehicle, I continued to smell the strong odor of an unknown alcoholic beverage coming from her breath as she spoke.

Due to the cues and clues that I had observed during my initial encounter with Ms. Lane, I asked her if she would be willing to perform voluntary Standardized Field Sobriety Exercises (SFSE) to aid in determining her level of impairment. After requesting Ms. Lane to submit to field sobriety exercises, she said no and refused to perform the exercises. I then informed her that her refusal to do the exercises could be used against her in court and that I would have to make a decision based upon my observations thus far. I asked her if she understood. She stated yes and agreed to perform the exercises.

(Note: The summary below is not intended to be a verbatim account of all the events that took place during the administration of the standardized field sobriety exercises. Video footage and audio of the exercises is available upon request.) Each exercise was explained and demonstrated prior to the subject attempting to perform the exercise. The area where the exercises were conducted was clear of debris, on a flat surface.

Horizontal Gaze Nystagmus (HGN):
The first exercise that I performed with Ms. Lane was the Horizontal Gaze Nystagmus exercise. I placed Ms. Lane in a position with her feet together and hands down by her sides. I asked Ms. Lane a series of medical questions to ensure that she would be able to perform each of the exercises safely and without any deficiencies. Ms. Lane advised me that she would not have any issues performing the exercises. I asked Ms. Lane if she wears glasses or contact lenses. Ms. Lane advised no. During the initial passes, I observed no resting nystagmus, equal pupil size, and equal tracking in both eyes. During the second series of passes, both eyes exhibited a lack of smooth pursuit. I observed the onset of nystagmus in both eyes prior to 45 degrees and distinct sustained nystagmus at maximum deviation

in each eye. During the Horizontal Gaze Nystagmus, Ms. Lane was told to stop moving her head multiple times. I did not observed Vertical Gaze Nystagmus.

Walk-and-Turn:
The next exercise that I performed with Ms. Lane was the walk-and-turn. I placed Ms. Lane in the starting position. She failed to maintain the starting position. I explained and demonstrated the exercise for Ms. Lane multiple times. I explained the exercise multiple times to Ms. Lane. I explained the exercise to her and asked her if she understood the instructions. She stated yes. I asked Ms. Lane if she had any questions, she said no. Ms. Lane began performing the first nine-step series; she missed heel-to-toe six times, and I counted ten steps instead of nine. Ms. Lane began performing the second nine-step series; he missed heel-to-toe six times, used both hands for balance and I counted eight steps.

One-Leg Stand:
The last exercise that I performed with Ms. Lane was the One-Leg stand. I placed Ms. Lane in the starting position; I explained and demonstrated the exercise to her. I asked her if she understood the instructions and she advised me that she understood. I used a digital watch to count to 30 seconds. Ms. Lane began performing the exercise, raising her left leg. Ms. Lane failed to look at the raised foot, had her foot extremely high and used both hands to help maintain her balance by putting them into a prayer position. She did not count out loud as she was instructed to do so and she also put his foot down once.

Based upon the above information and the totality of the circumstances, I determined that there was probable cause to believe that KAREN L LANE committed the offense of driving under the influence by being in actual physical control/operating a motor vehicle while under the influence of alcoholic beverages, any chemical substance per Florida State Statute 877.111, or any controlled substance per Chapter 893, while her normal faculties were impaired. I placed KAREN L LANE under arrest at 12:11 A.M for the above offense and handcuffed her behind his back, double locked, spaced and tightened the cuffs. After being searched, Ms. Lane was placed in the back seat of my marked patrol (FHP3475) vehicle with the seat belt placed around her for safety. Her vehicle was towed by Sister's towing. She was then transported to the Palm Beach County Breath Alcohol Testing (BAT) facility. I conducted a twenty-minute observation period where I ensured that she did not ingest anything by mouth or regurgitate (mouth was confirmed to be empty prior to beginning of the observation period). Ms. Lane was then asked if she was willing to provide a breath sample to determine the alcohol content of her breath. She stated no and refused to provide a sample. I then read the Florida Implied Consent driver's license suspension warning and asked her if she understood. She stated yes and agreed to provide a sample. The first sample came back with a result of .107. The second sample came back with a result of .115. See BAT video footage for a complete account of the incident.

Ms. Lane was then transported to the Palm Beach County jail for booking and processing and charged with DUI.
