Court Case #:

Document Date: 10/09/2025

Defendant's Name PACKEY, RAYMOND KEITH **Agency Case Number:** wgpd25off003130

NARRATIVE: The undersigned has probable cause to believe the above-named defendant on the, 09 of October 2025 at 1:29 at WEST COLONIAL / TUCKER OAKS BLVD (Zone: C05) in Orange County did

On 10/9/2025, I, Officer McMorrow, was conducting routine patrol in the uniform patrol capacity. At approximately 0058 hours, I was conducting stationary radar. I then visually observed a White Ram Pickup traveling west on West Colonial Drive passing the intersection of Hyde Park Circle. I visually estimated the vehicle to be traveling 72 miles per hour in a posted 45 mile per hour zone. I then used my department issued radar. This radar was last calibrated on 9/9/2025 and function tested prior to and after enforcement action. While operating this radar I heard a clear and distinct doppler tone, the visual display matched my visual estimate of 72 miles per hour. Due to this I positioned my patrol vehicle behind the pickup in an attempt to conduct a traffic stop. While doing so, the pickup maintained its speed. The pickup then moved from the middle lane striking the lane divider line with its two passenger tires. The vehicle corrected its lane violation and swerved to the left side of the lane without touching the divider line. The vehicle then swerved back to the right side of the lane and did not touch the divider line. I then activated my emergency lights on the patrol vehicle to conduct a traffic stop. The vehicle continued at a steady speed for a few seconds then slowed to a stop pulling onto the right-side of the curb.

I then approached the driver and sole occupant and identified him as Raymond Packey (SUSPECT W/M 4/22/1973) by his Florida Drivers License. I immediately observed the odor of intoxicants emitting from the vehicle and additionally observed bloodshot watery eyes. Raymond initially informed me that he was coming from downtown and clarified downtown Winter Garden. Raymond also without asking informed me of a medical problem he currently had. Raymond informed me without question that he had a Para needle operation. I then asked Raymond where he was at downtown, he stated he was at downtown Orlando at his girlfriend's house. While speaking with Raymond I further detected the odor of intoxicants emitting from his breath. Additionally, Raymond had slurred delayed speech while speaking with me. While speaking with Raymond, he informed me that he was prescribed oxycodone from his operation. Raymond also verbally admitted to having alcohol at the Hangry Bison.

Due to the driving pattern, the excessive speed, swerving inside the lane, and striking the dividing line. In addition to the odor of alcohol, bloodshot watery eyes, slowed delayed speech, and the admission of consumption. I believed it was necessary to conduct Standardized Field Sobriety Exercises (SFSE's) to assist in determining impairment. To do so, I asked Raymond to step out of the vehicle. Raymond stepped out of the vehicle Raymond slowly stepped out of the vehicle using the door for support. Raymond then stepped up onto the sidewalk unable to walk in a straight line from the truck to sidewalk. Prior to conducting SFSE's I asked Raymond a series of questions from the Winter Garden DUI Worksheet.

Raymond stated that he hoped his procedure would not affect his ability to walk balance or stand. Raymond also contradicted his previous statement of taking medication, he stated he had not received the oxycodone from the procedure or taken any. Raymond stated he does not wear prescription glasses. Raymond stated that he is diabetic. Raymond stated he does not take insulin or any medication. Raymond stated he is not epileptic. Raymond stated he was not sick or injured besides his surgery. Raymond stated if he does take anything it does not affect him. Raymond stated he had never had a head injury. Raymond stated the only allergies were to penicillin and sulfur. Raymond stated he had eaten at approximately 1915 hours. Raymond stated that he had a CV – Joint issue with his vehicle. Raymond explained while this is a problem, it does not affect his ability to drive in a straight line. Raymond stated that he feels he is functioning at 100 percent capacity. Raymond stated he had two drinks at Tony's. Raymond stated he had two small drinks of bourbon. Raymond stated on a scale of 0 – 10 with 0 being sober and 10 being impaired, he was a 2. Raymond then stated that the ground conducting the exercises on was flat, level, well lit, and clear of debris. Raymond stated that he had no issues seeing blue tape. Raymond was wearing brown dress shoes. Raymond stated that this would not affect his ability to stand, walk, or balance, and I told him to let me know at any point if he would like to conduct these without his shoes. Raymond stated verbally that he would conduct SFSE's with me.

Orange County **ICJIS Arrest Affidavit** (continued)

Arrested ☑ At-Large ☐ JRA ☐ **Document #:** 1134630 **Division #:**

Document Date: 10/09/2025 **Court Case #:**

The following exercises were completed based off of a SFST Notebook. This book is provided by the Orange County Sheriff's Office. Raymond either stated or motioned that he understood the instructions as they were read. I further ensured all police "take down lights" were not activated and all visible police flashing lights were deactivated.

Horizontal Gaze Nystagmus (HGN):

I placed Raymond in the starting position, Raymond had a distinct back and forth sway of his body. Raymond fixated on the stimulus while I conducted the HGN Exercise. While doing this, Raymond would lean into the stimulus causing some steps in this exercise to be repeated. Prior to starting I checked Raymond's eyes for equal tracking and equal pupil size. Raymond further lacked smooth pursuit in both the left eye and the right eye. I then observed nystagmus at maximum deviation in the left and right eye. I then observed onset nystagmus prior to forty-five degrees at approximately thirty-degrees. I observed this onset nystagmus in both the left and right eye. I then conducted vertical gaze nystagmus which was observed in both the left and right eye. Due to the clear and sustained nystagmus I further believed Raymond to be impaired.

Walk and Turn (WAT):

Prior to starting this exercise, I placed Raymond in the starting position. I gave Raymond clear directions not to move from the starting position which he stated he understood. Raymond stepped off of the starting position prior to instructed. Additionally, Raymond started this exercise prior to my instruction. I placed Raymond back into the starting position after he started too early. Raymond now had a distinct gap between his foot. Raymond began this exercise. On step seven walking down the line he fell of balance. Step 7 was off of the line and he raised his arms higher than 6 – inches to balance. Additionally, Raymond took a total of 12 steps down the line and conducted an improper turn outside of direction. Raymond then started to walk back down the line and on step 2 he stepped off the line. On step three he took a considerable gap in-between his supposed to be heel-to-toe steps. Raymond took a total of 10 steps back down the line, from steps 2 to step 10. These steps all had the large noticeable gap. It was as if Raymond was conducting normal steps down the line. Due to this clues, I further suspected Raymond to be impaired.

One Leg Stand (OLS):

I placed Raymond into the starting position. Raymond stated he understood all of the instructions prior to beginning. Raymond prior to beginning stepped out of the starting position. Raymond also further slurred his words asking until what sign instead of what time. I knew this to be a mistake because Raymond immediately corrected it. Raymond began this exercise and put his foot down first at approximately 5 seconds. Raymond repeatedly lifted his foot and immediately put it back down until the 20 second mark. Raymond stopped after approximately 20 seconds, and stated he could not due this because he did yoga. I then told Raymond he could stop and he continued the exercise repeatedly putting his foot down. Raymond then experimented with his other foot (left) and put it down, Raymond then lifted his arms and leg greater then 6-inches to maintain balance.

Lack of Convergence (LOC):

For this exercise I placed Raymond into the starting position. Raymond stood with his feet together and hands at his side. Raymond had a rock back and forth during this observation. I completed this exercise twice and both times observed a LOC in his eyes.

Arrested ☑ At-Large ☐ JRA ☐ | Document #: 1134630 | Division #:

Document Date: 10/09/2025 | Court Case #:

Modified Romberg Balance (MRB):

I placed Raymond into the starting position. Raymond stated that he understood the concept of time and he understood all of the instructions. Raymond also rocked back and forth during this exercise. After stating to stop, I stopped my timer which displayed twenty-two seconds. This was outside the normal range of twenty-five to thirty-five seconds.

Finger to Nose (FIN):

I first placed Raymond into the starting position, Raymond stated that he understood the difference between his left and right. Raymond showed his left hand by raising it. Raymond did the same maneuver with his right hand. I then started with the exercise I first directed Raymond to use his left finger which he touched to the tip of his nose with the pad of his finger. I then directed Shane to use his right finger he touched to the tip of his nose with the tip of his finger. Raymond then touched the tip of his nose with the tip of his right finger. Raymond touched the tip of his left finger to the tip of his nose. Raymond then touched the pad of his right finger to the side of the nose. In doing so he first hesitated in raising his right hand. Raymond then touched the pad of his right finger to the tip of nose. Raymond then touched the tip of his left finger to the tip of his nose.

THIS CONCLUDES THE SFSE EXERCISE'S

Due to the totality of circumstances, I placed Raymond under arrest for suspicion of DUI. I placed Raymond in handcuffs which double locked and checked for tightness. I conducted a search of Raymond which resulted in negative contraband. Officer Dwyer conducted an inventory search of the vehicle which was towed by Car Store. I transported Raymond to the DUI center without incident.

Upon arrival to the breath test center, there was a minor delay due to staffing. I conducted a 20-minute observation period with Raymond to ensure there was nothing currently in his mouth, and he did not ingest anything during this observation. After conducting this 20-minute observation, breath test operator (BTO) Dempsey conducted the breath test examination. Raymond refused to consent to a breath test after hearing the consequences. Due to this I issued Raymond three citations. I issued Raymond the DUI Citation under: 1820-XBC. I issued Raymond the criminal citation for refusal to submit under UTC: ALFMI4E. I issued Raymond a citation for his speed under UTC: ALFMI3E. Raymond was then transported to BRC without incident.

It should be noted that as of 9/17/2025 I have completed the DWI Detection and Standardized Field Sobriety Testing course. Additionally, as of 9/19/2025 I have completed the Advanced Roadside Impaired Driving Enforcement course. Further, I have been speed measurement certified in the State of Florida as of April 12th, 2024.

My body worn camera recorded this incident.
