Probable Cause

On Saturday May 16th 2023 at approximately 12:27am I was traveling southbound on Interstate 95 (State Road 9) in the center lane north of 6th Avenue South in my fully marked Florida Highway Patrol vehicle (FHP#0544 VIN: 2C3CDXAT2KH552993). While traveling southbound I observed a white in color Porsche in the outside center lane driving at a low rate of speed. The white Porsche not only was driving at a slow rate of speeding which forced other vehicles to slow and move around which was observed prior to activating my emergency lights and sirens north of 6th Avenue. The White Porsche failed to maintain its lane to the left while another vehicle was directly behind it who then drove around the white Porsche. The white Porsche also appeared to drift to the left lane line, while straddling on top of the marked line with both passenger side wheels, then back all the way over to the right lane line which was recorded with my vehicle dash camera and will be uploaded to FHP servers. I observed the white Porsche continue to drift back and forth from left lane line to the right lane line multiple times while driving at a slow rate of speed which was approximately 55mph in a marked 65mph zone.

I position my patrol vehicle behind the white Porsche to attempt to gather more information and enter the attached Virginia license plate in NCIC/FCIC, I was unable to get any information back regarding the license plate and advised Lake Worth Regional Dispatch center. I activated my emergency lights and sirens and conducted a traffic stop on the white Porsche. The white Porsche took an abnormal amount of time to slow and pull over, I had to increase my speed positioning myself close to the rear end of the white Porsche and advise the driver through my patrol vehicles PA system, to pull off the roadway and stop the vehicle. The white Porsche came to a controlled stop on the right outside shoulder just north of County Road 812 (Lantana Rd.)

I approached the white Porsche on the passenger side and made contact with the driver. I could immediately smell the odor of an unknown alcoholic beverage. I advised the driver the reason for the stop. The driver appeared to be slow in his movement, I immediately observed that he had glassy and blood shot eyes. I asked the driver for his driver's license, registration and insurance. I identified the driver by Virginia Drivers License as Robert, E Loftus (DL: T61688064, W/M, DOB: 8/5/1960). I was able to identify the White Porsche once I received the registration from Mr. Loftus. After confirming all information, I was provided with by Mr. Loftus, I asked him if he had any current medical issues or was currently taking any medication, he replied no other than blood thinners. I further asked him if anything was wrong with his vehicle, he replied no. Its important to notate that while speaking with Mr. Loftus, he spoke with a slow manner of speech and seemed to have trouble with this ability to multi task. I had to advise Mr. Loftus again for his vehicle registration. Mr. Loftus appeared to have slow and lethargic behavior. I advised the driver to step outside of the vehicle and walk to the rear so that I could further speak with him in front of my patrol vehicle. I observed the drive exit his vehicle, he walked slowly over to the front of my patrol vehicle. As Mr. Loftus approached the front of my patrol vehicle he almost stumbled backwards. Note: when asked to step outside of his vehicle, Mr. Loftus stated, "c'mon sir, I live right there and I'm almost home, you don't need to do this".

NOT A CERTIFIED COPY

While speaking with Mr. Loftus in front of my patrol vehicle I could still smell the odor of an unknown alcoholic beverage emanating from his breathe. I noticed his pupils were dilated, the light of my patrol vehicle made it easier to see how blood shot and glassy his eyes were. I asked Mr. Loftus where he was coming from, where he was going, and if he had anything to drink. He stated that he was on his way home from West Palm Beach and that he only had 2 beers. Note: he later stated at the Breath Alcohol Testing Facility (BAT) that he had a Miller Light and a shot of Tequila.
I advised Mr. Loftus that based on the totality circumstances I have reason to believe that may be under the influence of alcohol and/or drugs. I offered Mr. Loftus the opportunity to take voluntary Field Side Sobriety exercise to determine his level of intoxication, Mr. Loftus agreed. I advised Mr. Loftus that we could move to a better location if he does not feel comfortable performing the excises on the side of the Interstate. He was asked if he thought the ground surface was level and if he would feel comfortable performing these exercises, Mr. Loftus agreed and stated yes.

Prior to administering the voluntary exercises, I advised Mr. Loftus to stand in the starting position with his feet together and his at his sides. I asked Mr. Loftus if he was currently wearing contacts or glasses, he replied no. I asked again regarding any medical conditions, medications or injuries, he stated that he does not have any aside from blood thinners. Each exercise was explained and demonstrated prior to Mr. Loftus attempting to perform the exercises. Video and audio footage are available upon request. The summary below is not intended to be a verbatim account of all the events that took place during the administration of the standardized field sobriety exercises.

Horizontal Gaze Nystagmus Exercise

A black ball point pen with a white tip was used as a contrasting stimulus. Mr Loftus stated that he could clearly see the tip of the stimulus as well as the tip of my finger. The exercise was explained, and Mr. Loftus stated that he understood the directions. During the entire duration of this exercise Mr. Loftus was unable to keep his head straight and was told consistently not to move his head but to only follow the stimulus with his eyes. Mr. Loftus failed to keep his head straight both vertically and horizontally. Mr. Loftus also had to be told to correct his standing position, by placing his feet correctly.

-I checked for resting nystagmus which was not observed in either eye
-I checked for equal pupil size and equal tracking; Both pupils were equal in size but both eyes did not track the stimulus equally.
-I observed a lack of smooth pursuit in both eyes
-I observed horizontal gaze nystagmus at maximum deviation in both eyes
-I observed horizontal gaze nystagmus prior to 45 degrees in both eyes
-I did not observe vertical gaze nystagmus in either eye

Walk and Turn Exercise

Yellow tape was placed vertically in front of my patrol vehicle. Mr. Loftus stated that he agreed that ground surface was level and that he could perform the exercise. The exercise was explained and demonstrated, Mr. Loftus stated that he understood the directions. He later stated that the ground was slightly sloped, I advised Mr. Loftus that we could redo the exercises in a different location. He was also given this option before starting the exercises initially. Mr. Loftus advised that he was fine and that he would continue them where we were. Mr. Loftus was unable to maintain the starting position and kept placing the wrong foot in front. At no point in time was Mr. Loftus able to maintain the correct starting position. Mr. Loftus constantly stepped of the line on every step and was unable to maintain his balance throughout the duration of the exercise.

-Unable to maintain starting position
-Started to soon
-used arms for balance
-Incorrect turn and unable to maintain balance
-Stepped off the line numerous times
-*in correct number of steps*
-Did not touch heel to toe
-consistently stepped off the line

One Leg Stand Exercise

The exercise was explained and demonstrated, Mr. Loftus stated that he understood the directions. Mr. Loftus was unable to perform the excise considering he consistently put is foot down. He stopped counting and did not understand whether he should continue or what he should do until advised.

-Swayed
-Put foot down (consistently)
-Unable to keep hands on hip
-Foot was not parallel with the ground
-Unable to maintain balance

Based upon the performance of the above exercises and the totality of the circumstances I determined that there was probable cause to believe that Robert E. Loftus committed the offense of driving under the influence by being in actual physical control/operating a motor vehicle while under the influence of alcoholic beverages, any chemical substance per Florida State Statute 316.193, or any

controlled substance per Chapter 893, while their normal faculties were impaired. He was placed under arrest at approximately 12:49AM for the above offense. He was handcuffed behind his back in the front of my patrol vehicle and placed in the rear left seat.

I transported Mr. Loftus to Palm Beach County Breathe Alcohol Testing (BAT) facility with no further incidents. Mr. Loftus underwent a 20-minute observation period at approximately 1:17am where he did not ingest anything by mouth or regurgitate (mouth was confirmed to be empty prior to beginning the observation period. At approximately 1:42am Mr. Loftus consented to providing two breath samples. The first breath sample provided had a result of 0.154, The second breath sample provided had a result of 0.150. Mr. Loftus was read Florida Miranda Warning. (See BAT video footage for a complete account of the question and answering segment). Mr. Loftus was then booked into Palm Beach county jail with no further incident.

All events occurred in Palm Beach County, State of Florida.
