DUI PROBABLE CAUSE AFFIDAVIT

On the 29th Day of Feburary at 2231 A.M. P.M.

Subject: Talan Adamson Case Number: 20240003624

Agency: West Palm Beach Police Department Arresting Officer: Gittens #2263

Personal Contact

Driving Pattern Actual physical control (physical evidence putting the driver behind the wheel)

On January 29th, 2024, at approximately 2151 I responded to a traffic stop being conducted by Officer Silva at the intersection of Clematis St. and N Rosemary Ave. Upon arrival I spoke with Officer Silva who informed me he had stopped the black BMW because it had a modified exhaust and no tag. Officer Silva stated while making contact with the driver in physical control of the vehicle, Talan Adamson, he learned Adamson was driving with a suspended license. Officer Silva also detected a strong odor of marijuana emitting from Adamson. Officer Silva detained Adamson due to the suspended license.

Observation of Driver

Officer Silva also detected a strong odor of marijuana emitting from Adamson. When I made contact with Adamson, I detected a strong odor of Marijuana coming from Adamson. I observed Adamson's eyes were red.

Drivers Statements:

I asked Adamson if he had smoked any marijuana and he stated he had smoked a joint 2-3 hours prior to driving.

Odors:

Officer Silva also detected a strong odor of marijuana emitting from Adamson. When I made contact with Adamson, I detected a strong odor of Marijuana coming from Adamson.

Roadside Tasks

Horizontal Gaze Nystagmus

- ☐ Left Eye Does Not Follow Smoothly
- ☐ Left Eye Jerks at 45 Degree Angle or Less
- ☐ Distinct Jerking Left Eye at Maximum Deviation
- ☐ Right Eye Does Not Follow Smoothly
- ☐ Right Eye Jerks at 45 Degree Angle or Less
- ☐ Distinct Jerking Right Eye at Maximum Deviation

I asked Adamson if he had any medical issues with his eyes that were not corrected with glasses or contacts. Adamson advised he did not. I explained to Adamson I would be checking his eyes and gave him instructions to follow my finger with his eyes and only his eyes. I held up my right index finger and told Adamson to look at the tip of my finger. I told Adamson to keep his head still. Adamson stated he understood. I checked Adamson's eyes for equal pupil size and resting nystagmus. Adamson had equal pupil size and did not have resting nystagmus. I told Adamson with his eyes and only his eyes only to follow the tip of my finger. I made two passes with my finger from center to maximum deviation then back to center on each eye to check Adamson's eyes for equal tracking. Adamson's eyes tracked equally. After medically qualifying Adamson I immediately started two passes on each eye from center to maximum deviation then back to center to check for lack of smooth pursuit. On both passes I did not see nystagmus in either eye. After checking for lack of smooth pursuit I immediately started two passes on each eye to check for distinct and sustained nystagmus at maximum deviation. I moved my finger from center to maximum deviation, holding at maximum deviation for approximately eight seconds then back to center for both eyes. On both passes I did not see distinct and sustained nystagmus at maximum deviation for either eye. I then started two passes on each eye to check for onset of nystagmus prior to 45 degrees. I did not see nystagmus prior to 45 degrees on either eye during both passes. After checking for onset of nystagmus prior to 45 degrees, I started two passes for vertical nystagmus and did not see nystagmus on any passes.

Walk and Turn Task

Prior to starting the walk and turn evaluation, I asked Adamson if he wanted to perfom the evaluation in the sandals he was wearing and he stated he wanted to take them off. Adamson then took off his sandals prior to starting the evaluation. I instructed Adamson to stand with his feet together and his arms down by his side. I asked Adamson to put his right heel touching his left toe along a line (parking line) extending straight off his left toe and to remain standing in that position until I told him to begin the evaluation. I asked Adamson if he understood those instructions and he said he did. I instructed Adamson when I told him to, he would take nine heel to toe steps along the line in front of him. I told Adamson that on his ninth step he would leave his lead foot on the line and make a series of small steps around and make nine heel to toe steps back along the same line. I told Adamson that it would look exactly like this and demonstrated the evaluation for him. I demonstrated the evaluation for Adamson. I told Adamson there were four things I wanted him to keep in mind while completing the evaluation. I told him to look at his feet at all times, count his steps out loud, keep his arms at his side at all times, and to not stop until he had completed the evaluation. Adamson stated he understood all the instructions. While conducting the evaluation Adamson displayed five of six clues (stops while walking, steps offline, missed heel to toe, incorrect number of steps, and incorrect turn).

One Leg Stand

I asked Adamson to stand with his feet together and his arms down by his side and I would tell him when to begin. I told Adamson when I told him to, I wanted him raise either one of his feet approximately six inches off the ground, parallel to the ground, and count out loud in the manner of "one thousand one, one thousand two, one thousand three" and so on until I told him to stop. I told Adamson it would look exactly like this and demonstrated it for him. I told Adamson there were four things I wanted him to keep in mind while performing the evaluation. I told Adamson to look at his raised foot at all times, count out loud, keep his arms at his side at all times, and to not put his foot down until I told him to stop. I asked Adamson if he understood these instructions and he said he did. While conducting the evaluation Adamson displayed none of four clues.

Finger To Nose

I told Adamson to stand with his feet together and his arms by his side. I asked Adamson if he knew his right from his left and he demonstrated he did. I had Adamson extend his index fingers while making a fist. I had Adamson face his palms toward me with his arms by his side. I told Adamson when I told him to, I wanted him to close his eyes and tilt his head back. I advised Adamson when I instructed him to, I would tell him either left or right. I told Adamson if I said right, I wanted him to touch the tip of his right finger to his nose and then return his hand back to his side. I told Adamson if I said left, I wanted him to touch the tip of his left finger to his nose and then return his hand back to his side. I asked Adamson if he understood, and he stated he did. During the evaluation Adamson missed his nose on four of the six commands. Adamson's eyelids had a slight flutter to them while closed and his body had a slight sway.

Romberg Balance

I told Adamson to stand with his feet together and his arms by his side. I asked Adamson if he could count to thirty and he stated he could. I told Adamson when I instructed him to, I wanted him to tilt his head back and close his eyes. I told Adamson I wanted him to approximate the passage of thirty seconds in his head. I told Adamson when he finished to look at me and tell me he was done. I asked Adamson if he understood those instructions and he stated he did. I told Adamson to begin, and he finished after approximately 36 seconds. Adamson's body had a slight sway and his eyelids had a slight flutter while conducting the evaluation.
