PROBABLE CAUSE STATEMENT

The undersigned certifies and swears that he/she has just and reasonable grounds to believe, and does believe that the above named Defendant committed the following violation of law.

The Person taken into custody . . .

☒ committed the below acts in my presence.

☐ confessed to _____ admitting to the below facts.

☐ was observed by _____ who told _____ that he/she saw the arrested person committ the below acts.

☒ was found to have committed the below acts, resulting from my (described) investigation.

On the 20 day of December, 2025 at 03:20 (Specifically include facts constituting cause for arrest.)

On Saturday, December 20, 2025, at 0024hrs, I, Officer Smigelski (ID 596) responded to the intersection of Gardens Parkway and SR 811, Palm Beach Gardens, FL 33410. This was in reference to serving as a backup officer for traffic crash that occurred at this location. My department issued body worn camera was utilized during this investigation.

Upon my arrival, I observed the two vehicles that were involved in the traffic crash, a blue 2015 Mazda 3 (tag number 04GMF) and a black 2017 Jeep Wrangler (tag number LJZP59). Both driver`s and sole occupants of the vehicles were outside the vehicles upon Ofc. Zarba and my arrival. I then assisted Ofc. Zarba, who was the primary investigating officer for the traffic crash. While collecting information from the driver of the Jeep, Tyler Knott (DOB 5/20/2000), I observed Knott to have slurred speech, red watery eyes, a strong odor of alcohol and was observed swaying side to side while standing stationary. Upon Ofc. Zarba, completing his crash investigation (case number 25-006396), a changing of the hats was conducted. I then informed Knott that a criminal investigation will be occurring due to the signs of impairment I have observed. Knott stated that he not drank any alcohol and was driving home from his friends house where he spent the past three hours. I then requested that Knott perform a series of standardized field side sobriety exercises to dispel my concern that he was driving while impaired, to which Knott agreed. It was then that I requested a supervisor so that I could conduct an impaired driver investigation in accordance with department policy.

The first exercise was testing for Horizontal Gauze Nystagmus and the stimulus used was a pen with an illuminated red tip. Upon completing the instructions, Knott stated that he understood the instructions. During the beginning of checking for lack of smooth pursuit, Knott exhibited a lack of smooth pursuit in both eyes. When checking for maximum deviation and prior to 45 degrees offset, Knott exhibited six indicators total. When testing for Vertical Gauze Nystagmus, he exhibited definite indicators. Knott was also observed swaying side to side.

PROBABLE CAUSE STATEMENT

The second exercise was the walk and turn, with a white traffic line as the stimulus. During the instruction portion, Knott was observed to have difficulty maintaining the starting position. Prior to the completion of the instructions, Knott began the exercise multiple times before being instructed to do so. After completing the instructions, Knott stated that he understood the instructions and began the exercise. During Knott`s first nine steps, I observed Knott missed heel to toe on every step, as well as stepping off the line. Also, during this portion of the exercise, Knott raised his arms in order to maintain his balance and was observed to lose his balance while walking heel to toe. During the turn, Knott performed an improper turn by turning in place instead of taking a series of small steps as he was instructed. Upon his return steps, Knott was observed to have stepped off the line as well as missing heel to toe on every step. Once again, Knott raised his arms in order to maintain his balance and was observed to have difficulty maintaining his balance during his return steps.

The third exercise was the one leg stand. Upon completing the instruction portion, Knott stated that he understood the instructions given to him and he began the exercise. Upon beginning the exercise, Knott was observed swaying side to side and raised his arms in order to maintain his balance. During the exercise, Knott was observed to be hopping from side to side indicating a lack of balance. Knott counted for twenty seconds and for the duration of the exercise he did not lower his foot to the ground.

The fourth exercise was the finger to nose. Upon completing the instruction portion, Knott stated that he understood the instructions given to him and began the exercise. When instructed to raise his left finger to his nose, Knott failed to touch the tip of his nose with the pad of his left finger. When instructed to bring his right finger to his nose, Knott failed to touch the tip of nose with the pad of his right finger. Knott was then instructed to bring his left finger to his nose and failed to touch the tip of nose with the pad of his finger. Knott was instructed to bring his right finger to his nose and once again failed to touch the pad of his finger to the tip of nose. Knott was then instructed to bring his right finger to his nose again, and Knott attempted to raise his left hand, and then raised his right finger to his nose. Knott failed to touch the tip of his nose with the pad of his right finger. Lastly Knott was instructed to bring his left finger to his nose, and he failed to touch the tip of his nose with the pad of his left finger. Also, during the duration of the exercise, Knott was observed to open his eyes and failed to keep his head tilted back at a 45-degree angle, as he was instructed to do so, and I had to remind him multiple times to remain in the correct position.

Based on my observations and the totality of the circumstances to this point, I placed Knott under arrest at 0121hrs. At the PBSO BAT I conducted a 20-minute observation period of Knot noting no issues. I asked Knott to provide a breath sample for the purpose of determining its alcohol content, to which he refused. At 0214 I then informed
