Vehicle was already stopped, see D/S Seigel ID # 12460 Probable Cause Affidavit. Vehicle was stopped heading southbound in the northbound lanes.

OBSERVATION OF DRIVER:

I observed that Greska Espluge was wearing black pants and brown shirt. While questioning Greska, I observed that she seemed to be confused by my questions and had difficulty knowing where she was or where she came from. I observed Greska's eyes appeared red and glassy. I observed that she was slurring her words. Greska was asked to exit the vehicle to perform field sobriety tasks and she agreed. While exiting the vehicle, Greska appeared to be shaky on her feet and swayed while walking.

DRIVER'S STATEMENTS:

I asked if the driver had been drinking or used any drugs, Greska stated no. I asked the driver what medical problems and/or previous injuries they had, Greska stated none. I asked what medications they take, Greska stated none.

☒ RT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES

Other Observations:

Once positioned in the front of my vehicle, I continued my investigation. I instructed Greska to keep her hands by their side, stand with her feet together, and follow a red light stimulus with her eyes not turning her head. I asked her if she understood my instructions. Greska verbally stated she understood my instructions. Greska, however swayed while standing stationary. I observed both eyes to be red, bloodshot, and glossy. Her left and right eye displayed equal pupil size, equal tracking, and a lack of smooth. I observed distinct and sustained nystagmus was present in both her left and right eye at maximum deviation during two separate four second evaluations. The onset of nystagmus was prior to a 45 degree angle in both her left and right eye during two separate four second evaluations. Vertical nystagmus was not present in both the left and right eye during two separate four second evaluations.

WALK & TURN:

I positioned Greska on a painted yellow line which was on a smooth and level surface, free of any debris and well lit by the headlights on my vehicle and nearby street lighting. I instructed the driver to place her left foot on the line and her right foot in front of the left touching heel to toe. I instructed her that she was to keep her hands at her side and stay in this position until I instructed him/her to do otherwise. I instructed him/her to walk nine heel to toe steps counting out loud, while watching her feet. On the ninth step she was to keep her front foot on the line and use her back foot, in a series of small steps, to turn around before walking nine heel to toe steps the opposite direction counting out loud and watching her feet. I demonstrated the task while I was verbally instructing her in the proper way to complete the task. During the task, I observed the driver swayed while balancing, started too soon, did not touch heel to toe, stepped off the line 2 times. Used arms to maintain balance (+6"), stopped after she turned and asked if she needed to continue. Incorrect number of steps.

ONE LEG STAND:

I placed Greska with her feet together and arms at her side. I demonstrated the task as I verbally instructed her to raise one of her feet approximately six inches off of the ground, point her toe towards my patrol car, look at the raised foot, and count out loud 1001, 1002, 1003 and so on until told to stop. I asked her if she understood the instructions and demonstration I provided. After Greska stated she understood my instructions, the task was performed. While Greska stood in the instructional position, I observed Greska started too soon and swayed while standing stationary. While raising her foot she swayed while balancing, put foot down (within 30 seconds), could not do task (put foot down three times).

FINGER TO NOSE:

I instructed Greska to stand with her feet together, make each hand into a fist keeping, extended her index fingers and to place her palms facing up. She was instructed to lower their arms by their side. I instructed and demonstrated the proper hand and arm position and for her to remain in this position while I demonstrated the rest of the task. I instructed and demonstrated her to tilt her head back approximately 45 degrees and close their eyes while waiting for a verbal command of left or right. On the command of "left" or "right", she would raise the requested hand, touch the tip of her finger to the tip of her nose, then bring their hand immediately back down to her side. During the instruction and demonstration of the task she swayed heavily while standing in the instructional position. I asked her if she understood the instructions I provided and she verbally stated she understood. I instructed her to start the task as explained. During the task, I observed the driver did not keep eyes closed, failed to return arms to side, correct finger did not touch tip of nose, and did not keep her head back.

ROMBERG ALPHABET:

I verbally inquired if Greska could count to thirty. Greska stated she was able to count to thirty and I instructed her to place their feet together with her arms at their side and stay in this position until told to do otherwise. I instructed her that upon starting she was to tilt her head back approximately 45 degrees and close their eyes. She would begin to count to thirty in a slow and methodical manner without singing or rhyming it. I asked him/her if he/she understood the instructions and he/she verbally replied he/she understood. During the instructions he/she continued to sway while standing stationary. I instructed Greska to start the task as explained. During the task, I observed the driver swayed more than (+2") from side to side and did not stop at thirty.
