Probable Cause

On April 24, 2019 I was on routine patrol in my marked patrol car in Palm Beach County. I responded to the scene of a traffic stop that occurred on Blue Heron Blvd just west of I-95 (State Road 9) exit ramp. Sgt. B. Handzik stated to me that she stopped a vehicle for speed violation and observed signs of impairment from the driver. She stated that the driver had bloodshot glassy eyes, slurred speech and the odor of an unknown alcoholic beverage was emitting from her breath as she talked. I then approached the vehicle and identified myself to the driver. The driver was later identified as Hayley Compher by her FL DL. I observed that she had bloodshot glassy eyes, dilated pupils, slurred speech and the odor of an unknown alcoholic beverage was emitting from her breath as she talked. She stated to me that she was coming from work and that she had a beer and a half before leaving work and heading home. I then requested that she step out of the vehicle and walk towards my patrol car. As she stood in front of me I observed that she had an orbital sway, bloodshot glassy eyes, dilated pupils and the odor of an unknown alcoholic beverage was emitting from her breath as she talked. I then requested that she perform field sobriety exercises and she agreed.

Horizontal Gaze Nystagmus

Before beginning the exercises, I checked to see if Ms. Compher was wearing glasses or contact lenses. It was determined that Ms. Compher was not wearing glasses and was wearing contacts. I then checked her eyes and observed equal tracking and equal pupil size. She was instructed to place her feet together and place her hands down at her side. She then was instructed to keep her head still and follow the stimulus with her eyes and her eyes only. She was also instructed to keep looking at the stimulus until told not to. She verbally indicated that she understood. During the exercise I observed 6 of the 6 possible clues.

- Lack of smooth pursuit, left eye
- Lack of smooth pursuit, right eye
- A distinct and sustained nystagmus at maximum deviation in the left eye
- A distinct and sustained nystagmus at maximum deviation in the right eye
- An onset of nystagmus prior to 45 degrees in the left eye
- An onset of nystagmus prior to 45 degrees in the right eye

I also observed that she observed body tremors and an orbital sway. I estimated the initial angle of onset to be 35° and dilated pupils.

Walk and Turn Exercise

The area was level and free of debris. Ms. Compher indicated that she observed the white line on the ground. Ms. Compher was instructed to put her left foot on the line, then place her right foot on the line ahead of the left foot in a heel to toe manner. I then demonstrated this position. She was instructed not to begin until told to do so. Ms. Compher verbally indicated that she has understood all instructions up to this point. Ms. Compher was then instructed to take 9 heel to toe steps on the line when told to do so. I then demonstrated this. Ms. Compher was then instructed to turn on the ninth step and to keep the front foot on the line and to take a series of small steps with the foot on the line. I then demonstrated this. Ms. Compher was also instructed to keep her arms at her sides and to watch her feet during the exercise. Ms. Compher was also instructed to count aloud and to not stop once she begins the exercise. She was also instructed to keep her arms at her sides at all times.

As she was in the instructional position she kept beginning the exercise and had to be told multiple times to return to the position. At one point she almost fell trying to get into the position. She began the exercise and took 16 steps forward and incorrectly completed the turn. She took both feet off the line and reset. As she conducted the exercise she missed heel to toe on all steps and stepped off the line multiple times. She then continued and took 10 steps back and missed heel to toe on all steps and stepped off the line several times.

One Leg Stand Exercise

Ms. Compher was instructed to stand with her feet together and to place her arms down at her side. Ms. Compher was instructed to maintain that position until told to do so. Once told to do so, she was instructed to raise one leg approximately 6 inches off the ground and to keep both legs straight with both arms at her side. She was also instructed to look at the elevated foot and count aloud in the manner of one thousand-one, one thousand-two and so on until told to stop. Ms. Compher verbally indicated that she understood the instructions after I demonstrated to her.

She began the exercise and raised her right foot. She bent her leg and did not look down at her foot. She hopped several times and almost fell. She also had an orbital sway and she placed her foot down several times during the exercise.

Finger To Nose

Ms. Compher was instructed stand with her feet together and arms at her side and to have her index fingers pointed out. She was instructed t not start and stay in that position until told to do so. She stated that she understood. I then demonstrated the position. Ms. Compher was then instructed to when told to start to close both eyes and tilt her head back . When told to do so she was instructed to bring the hand I directed upward, touching the tip of your finger to the tip of her nose. I then demonstrated this. She was then instructed to after touching the tip of the nose to immediately bring her hand down to her side. She stated that she understood. I then demonstrated and she stated that she understood. She was instructed to raise her hand in the following order, left, right, left, right, and right, left.

-Left: Missed nose.

Report Date / Time 4/24/2019 2:39:58AM	Report Number FHP99ARR797526	Case Number/CAD Number FHPL19OFF026620 / LWRC19CAD072973	Reporting Officer Name Z. TODD

- Right: Missed nose.
- Left: Missed nose.
- Right: Missed nose.
- Right: Missed nose.
- Left: Missed nose.

While conducting the exercise I observed an orbital sway and body tremors.

Modified Rhomberg Balance

During the exercise she was instructed to stand with her feet together and hands at her side. She was told to estimate the passage of 30 seconds in her head with her eyes closed and head tilted back. She was instructed that when she was done estimating to open her eyes and say "Stop."

She began the exercise and immediately I observed that she had body tremors and a 3-inch sway in all directions. She estimated 35 seconds. She almost fell during the exercise and stated that she was trying to count in a bartenders count. She was then placed under arrest for DUI and secured inside of my patrol car. I then conducted a 20- minute observation. At no time did she regurgitate or take anything by mouth. I then requested that she give a lawful sample of her breath and she agreed. She provided a sample of .165 , .192 and .169. She was then transported to the Palm Beach County Jail.

The above incident occurred in Palm Beach County.
