UNLAWFUL FOR OPERATOR TO POSSESS AN OPEN ALCOHOLIC BEVERAGE

PROBABLE CAUSE

On the above date and time, I was in service in Palm Beach County, Florida in my marked patrol vehicle. I was patrolling eastbound on Okeechobee Boulevard (State Road 704) west of Haverhill Road in the outside travel lane. I observed a dark green Toyota sport utility vehicle swerving from inside travel lane into the positive median barrier striking it twice. I positioned my marked patrol vehicle behind the vehicle, activated my emergency equipment, and initiated a traffic stop. Upon exiting my patrol vehicle, I observed the male driver move a beer bottle from the middle compartment and placed it behind the front passenger seat. I approached the vehicle, and observed a Hispanic male sitting behind the wheel who was later identified as Hermitanio Lopez Gomez through his Guatemala Passport. While requesting for his driver's license, registration, and proof of insurance, I observed the strong odor of an unknown alcoholic beverage emitting from his mouth area. His face was pale and flushed, and his eyes were red in color and glassy. His speech was mumbled and slurred. I asked him if he had been drinking to which he stated yes. I asked him how many drinks did he have tonight, to which he replied three beers. I asked him if he would be willing to do roadside exercises, to which he replied yes. When Mr. Lopez exited his motor vehicle, I noticed he staggered and attempted to use his driver side of his vehicle to hold himself up. I proceeded back to my marked patrol, and prepared an area to conduct roadside exercises.

Horizontal Gaze Nystagmus:

Prior to beginning the exercise, it was determined the subject was not wearing contacts or corrective lenses at the time. The subject's eyes displayed equal tracking and his pupils were equal sizes. The subject was instructed to follow the stimulus with his eyes only, keeping his head still. After stating he understood the instructions, the subject started the exercise.

The results of this exercise displayed 6 of the 6 possible clues.

- A lack of Smooth Pursuit in his left eye.
- A lack of Smooth Pursuit in his right eye.
- A distinct and sustained nystagmus in the left eye at maximum deviation.
- A distinct and sustained nystagmus in the right eye at maximum deviation.
- An onset of nystagmus in the left eye prior to 45 degrees.
- An onset of nystagmus in the right eye prior to 45 degrees.

Walk and Turn:

The subject was instructed to put his left foot on the line and his right foot in front of it with his right heel touching the toe of his left foot. He was instructed to stand in this manner with his hands to his sides until the instructions were completed and demonstrated. The subject was instructed not to begin until told to start. He was instructed to take nine steps along the line in a heel-to-toe manner. After the ninth step, he was advised to stop and turn around keeping his pivot foot on the ground, taking several small steps with the other foot to turn around. After turning around, he was to take nine steps in a heel-to-toe manner back along the line, in the direction he had come from. The subject was further instructed to watch his feet at all times

while walking, keeping his arms down to his side, and to count his steps out loud. After the exercise was demonstrated, the subject stated he understood the instructions and was instructed to begin the exercise.

After attempting the Walk and Turn, the subject displayed 5 of 8 possible clues.

Walk and Turn observations:

The subject failed to stay in the starting position. The subject started before told to do so. On the first set of steps, the subject failed to take the correct number of steps. The subject failed to walk in a heel to toe manner. The subject failed to make a proper turn. On the second set of steps, the subject failed to walk in a heel to toe manner. The subject stepped off the line on steps 2, 3, and 4. The subject used his arms to balance himself.

One Leg Stand:

Prior to attempting this exercise, the subject indicated he did not have any medical problems that would have prevented him from performing the test. The subject was instructed to stand with his heels together and hands down to his sides while the instructions were given during the exercise. The subject was instructed not to begin until told to do so. The subject was advised to raise the foot of his choice off the ground approximately 6 inches keeping his foot parallel with the ground. While his leg was raised, the subject was advised to keep his leg straight, watch his raised foot, and to count out loud by thousands (one thousand one, one thousand two, one thousand three...) and to continue until told to stop (25 seconds). After the exercise was demonstrated, the subject was advised if he understood the instructions to which he replied yes. I advised the subject if he did not have any questions, he may begin the exercise. When the subject attempted this exercise, he raised his left foot. During the exercise, the subject displayed 3 of the 4 possible clues.

---	---	------------	-----------------------------------	-------------	--------------------------------------	---------------------	---------------------------------

One Leg Stand Observations:

The subject put foot down three times during the exercises. The subject used his arms to balance himself. The subject swayed while performing the exercise. The subject switched from the left foot to the right foot.

Finger to Nose:

The subject was asked to stand with his feet together and his hands at his sides with his index fingers pointed. The subject was advised to not start until told to do so which he replied he understood. The subject was advised to close both his eyes and tilt his head back. I advised the subject when I tell you to, bring the hand I direct upward touching the tip of your finger to the tip of your nose. After demonstrating the instructions, I advised the subject if he understood the instructions, to which he replied yes. The exercise was conducted in the following manner of left, right, left, right, left, right, left. The subject failed to touch the tip of his finger to the tip of his nose on each attempt.

I then advised the subject as well as dispatch at 01:41 am that he was being placed under arrest pursuant to Florida Statue 316.193 operating a motor vehicle under the influence of alcohol and or a controlled substance. The subject was properly searched, and placed in the front seat of my marked patrol vehicle. The subject was transported to the Palm Beach County Jail. Upon arrival to the Palm Beach County Jail, the subject was escorted to the Breath Alcohol Testing Center, and a 20 minute observation was conducted to ensure the subject did not take anything by mouth or regurgitate. After the 20 minute observation, the subject was taken into the testing room and was asked to submit to a test of his breath. Mr. Lopez advised that he would provide a sample of his breath. He provided two samples of his breath (.119) and (.113). The first sample was provided at 02:30 am. The second sample was provided at 02:33 am. Mr. Lopez was then transported over to the booking side and was processed without any incident to himself.
