PROBABLE CAUSE STATEMENT

The undersigned certifies and swears that he/she has just and reasonable grounds to believe, and does believe that the above named Defendant committed the following violation of law.
The Person taken into custody

☐ committed the below acts in my presence.
☐ confessed to _____ admitting to the below facts.
☐ was observed by _____ who told _____ that he/she saw the arrested person commit the below acts.
☒ was found to have commited the below acts, resulting from my (described) investigation.

On the 8TH day of FEB 20 19 at 08:35 ☒ A. M. ☐ P.M. (Specifically include facts constituting cause for arrest.)

On 2/8/2019, I was dispatched to Barnett Drive and 10th Ave North, Lake Worth 33460, in reference to a DUI investigation to assist D/S Cruz on a crash.

Upon arrival, I met with D/S Cruz 9090 who advised that she was investigating a crash that involved two vehicles. D/S Cruz advised that one of the driver's that was in a white Chevy may possibly impaired. D/S Cruz advised me that she had concluded her crash investigation and I advised her that I would be conducting a criminal investigation for DUI.

I then made contact with the driver that was advised to me that may be possibly impaired at the white vehicle. I introduced myself to the driver and identified him by FL DL as Mark McKay Mason 10/25/1971. I advised Mark that D/S Cruz had concluded her crash investigation and I was going to be conducting a criminal investigation. Mark seemed to be very cooperative and I then advised him of his constitutional warnings. I read Mark his warnings from a card and he advised that he understood and signed the card that was read to him.

I observed Mark to have red blood shot and glassy eyes and seemed to be very jittery. Mark was drinking from an energy drink upon meeting him. I observed Mark to have small pupils and to have rotten front teeth. Upon initial contact. I also observed Mark to be wearing a blue long sleeve shirt and white and gray shorts with black shoes.

I then asked Mark to move towards my marked a patrol vehicle and he agreed to do so. Mark was very cooperative and talkative. Mark advised that he was just leaving Dunkin Donuts and the Methadone clinic when he got into a crash. He advised that this was the second time this had happened in a few weeks. Mark advised that he was driving and that his foot slipped off of the pedal and he collided with the vehicle ahead of him. I then asked Mark if he was taking any medication and he advised that he just left the methadone clinic and took [redacted] at about 0730 hours. I asked Mark if he has any physical problems and he advised that he does not. I asked Mark if he has any problems with his eyes that are not correct by glasses or lenses and he advised that he does not. Mark advised that he does not have any medical problems but is an addict. Mark advised that there was no issues with his vehicle that may have caused the crash and that the vehicle was a rental because his vehicle was in the shop due to being in another crash.

While speaking to Mark, he was speaking fairly quickly. I asked Mark if he would be willing to perform roadside exercises to check for impairment and he agreed to do so. Mark advised that he doesn't have any injuires that would prevent him from performing the exercises.

After roadside exercises were completed, Mark Mckay Mason, was placed under arrest for DUI and advised of this. Mark seemed surprised and began to get upset. I then placed Mark in handcuffs and secured him with 2 handcuffs due to his size to prevent injury to Mark. The handcuffs were double locked and checked for fit. Mark was then searched and I observed Mark to have a mouth clear of debris, rotting teeth, and teeth and were very ground down. I also observed Mark to have a discolored tongue with white/brown film on the top. Mark was then placed in the rear of my marked patrol vehicle and later transported to the Palm Beach County jail.

Upon arrival, I escorted Mark to the Breath Alcohol Testing center and conducted a 20 minute observation ensuring he did not take anything by mouth or regurgitate. During this 20 minute observation, Mark would be speaking to me and would nod off and fall asleep mid-sentence. I also began to observe Mark to have a droopy eye lids. Mark also advised that in addition to the [redacted] he took at about 0730 hours, he had taken ½ a bar of [redacted], 1mg, last night. He later advised me that he doses his [redacted] in the mornings.

After the 20 minute observation was completed, I escorted Mark to the testing room. I asked Mark identifying questions and during this time, he began to nod off mid-statement or have to be woken up to have him respond to the question. I then requested Mark to provide a lawful sample of his breath to determine its alcohol content and he agreed to do so. Mark provided two valid samples and the results were advised to him upon completion of the breath test. The two samples were 0.000 and 0.000. Mark was advised and he stated that he understood.

I then requested Mark to submit to urine test to detect for any chemical or controlled substances. He asked if he had to due to already submitting to a urine test at the methadone clinic. I advised him that this is a separate test and he agreed to submit to a urine test. Mark was advised of the implied consent in the event he changed his mind in providing a urine sample. Mark was asked if he understood the implied consent and it appeared that he nodded off and had to be woken up to have him respond. I then read him the implied consent again and he advised that he understood. I then read Mark his constitutional warnings and he advised that he understood them. At times, when reading them, he would nod off and had to be woken up again to respond if he understood them or not. If he advised that he did not understand it was re-read to him. I then asked Mark if he would be willing to answer questions and he advised that he would. See questions and answer sheet. While asking him questions, Mark would nod off and ramble incoherently. Mark was standing for part of the questions and due to him nodding off and the fear that he may fall and hurt himself, I asked him to sit down to prevent from any injury to himself.

After questions were answered, Mark was placed into the holding cell and he advised me that he will notify me when he is able to provide a urine sample. After a short period of time, Mark advised that he is able to provide a urine sample. A clean and clear urine sample cup was provided to him and he was able to provide a sample in my presence. I observed the urine sample leave from Mark's body into the sample cup. The sample was then turned over to me from Mark at approximately 1137 hours. The sample would be later turned into evidence for analysis.

Mark Mckay Mason was charged with DUI pursuant to F.S.S. 316.193(1) pending urine results.

Mark was then taken to booking for processing.

ROADSIDE TASKS

HORIZONTAL GAZE NYSTAGMUS:

- [x] LT EYE-LACK OF SMOOTH PURSUIT
- [x] RT EYE-LACK OF SMOOTH PURSUIT
- [x] LT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION
- [x] RT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION
- [x] LT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES
- [x] RT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES

Other Observations:

- Observed subject to have red bloodshot and glassy eyes and to have rotten teeth that appeared to be ground down. Observed subject to have equal pupil size and equal tracking. Observed subject to have very small pupils. Observed subject to have lack of convergence.

WALK & TURN:

- Subject advised that he did not have any injuries that would prevent him from performing the exercise. Subject advised that he understood the instructions and did not have any questions. When attempting the exercise the first time, subject was in the starting position and had observarable body tremors. Subject missed several heel to toe steps and stepped of the line several times. Subject used arms for balance during the exercise. Subject stopped on his 9th step on the first 9 steps and did not know what he was supposed to do. I asked him if he understood the instrucitons and he advised that he was nervous and has some attention problems. I advised him to stop and was provided the instructions again.
- 2nd attempt. Subject was provided the instructions without being in the starting position. Subject was then placed into the starting position and was provided the instructions again. Subject advised that he understood the instructions and did not have any questions. Subject began exercise. Subject missed several heel to toe steps on 1st nine heel to toe steps and stepped off of the line several times. Subject turned as instructed but reset his foot prior to starting the 2nd nine heel to toe steps. Subject missed several heel to toe steps on the 2nd nine heel to toe steps and stepped off of the line several times. Subject used arms for balance during the exercise.

ONE LEG STAND:

- Subject advised that he did not have any physical injuries that would prevent him from performing the exercise. Subject advised that he understood the instructions and did not have any questions. 1st attempt, subject raised left foot. Subject placed heel of his foot on the ground several times and was advised to raise up his foot. Subject swayed and used arms for balance. Subject hopped when performing the task.
- 2nd attempt. Subject was advised of the instructions and he advised that he does not have any questions. Subject raised left food. Subject swayed during task, used arms for balance, and placed foot on the ground several times.

FINGER TO NOSE:

- Subject correctly identified his left and right hands and also his index fingers. Subject advised that he understood the instructions and did not have any questions. Subject performed the task as follows. Left, was slow and deliberate touch to the bottom of his nose with this left index finger. Left, was slow and deliberate touch to the tip of his nose with the pad of his left index finger. Right, was slow an deliberate touch to the tip of his nose with the pad of his right index finger. Left, was slow and deliberate touch to the tip of his nose with the pad of his left index finger. Right, touched the tip of his nose with the pad of his right index finger. Right, touched the tip of his nose with the pad of his right index finger. Subject returned to the starting position as instructed.

ROMBERG ALPHABET:

- Subject advised that he understood the instructions and did not have any questions. I observed subject to have orbital sway and body tremors. Subject stopped task at approximately 31 seconds.
