D.U.I. PROBABLE CAUSE AFFIDAVIT

ON THE 29th DAY OF July 20 17, AT 1838 AM ☒ PM

SUBJECT: Phillips Michelle Lynde CASE NUMBER: 17108557

AGENCY: PALM BEACH COUNTY SHERIFF'S OFFICE ARRESTING OFFICER: Inv. C. Ficarra

PERSONAL CONTACT

DRIVING PATTERN: ACTUAL PHYSICAL CONTROL (PHYSICAL EVIDENCE OR STATEMENTS PUTTING DEF. BEHIND WHEEL OF VEHICLE)

On 07/29/2017 at approximately 1907 hours I responded to the intersection of 6th Ave South and Wright Drive, in the City of Lake Worth, in reference to a DUI crash investigation. Upon my arrival I met with the initial deputy on scene, D/S Hentze ID: 26709, who stated to me the following: There was a woman in the Montero and the driver of the vehicle in front of that did not want to make a crash report but he was concerned that the driver of the Montero appeared impaired. D/S Hentze stated that the driver of the Mitsubishi Montero bearing Florida tag GMZQ56 had a smell of alcohol and her speech was a bit slurred. I then made contact with the female driver of the Mitsubishi, Michelle Phillips, who was identified by her Florida issued driver's license. She was also the registered owner of the vehicle. I spoke with Michelle and asked her if she supplied the deputies with her driver's license which she stated she did. I observed that her eyes were slightly red, very glassy, and droopy. I immediately could smell the obvious odor of an unknown alcoholic beverage on her breath as she spoke. I retrieved Michelle's license from another deputy on scene and then spoke to the complainant/victim in this case, John Pryce. John stated that he pulled into the median and put on his turn signal and waited due to other traffic coming by. He then stated that the other vehicle "banged" him twice. John stated that the driver was a female and he could identify her as the driver of the vehicle. John stated he saw her driving and no one else was in the vehicle with her (see attached witness statement for further). I observed the damage done to John's vehicle. He had minor scratches and markings in the rear bumper where Michelle's vehicle struck his. Michelle's vehicle had no external signs of damage done to her bumper.

OBSERVATION OF DRIVER:

Deputy Hentze conducted the crash investigation (case number 17108556). I then spoke with Michelle who gave crash statements at that time. I observed that her speech appeared slurred, unclear, and she appeared to have mush mouth. As she spoke the odor of an unknown alcoholic beverage became more obvious. Her face appeared flush and droopy as well. I did not observe any open containers of alcohol in the vehicle at that time. I then repositioned my marked PBSO patrol vehicle so that the in-car video could observe my interaction with Michelle. I then asked Michelle to step out of the vehicle so I could speak with her which she did. I observed that Michelle had a circular sway as she stood still. I then informed Michelle that the crash investigation was completed and a DUI investigation was starting and that I would have to read her her Constitutional Warnings. I then read to Michelle her Constitutional Warnings which she stated she understood. Post-warnings she stated the following: Michelle stated she did not need Fire Rescue, was not injured, and had not physical defects or injuries. She stated she wore glasses for reading but no issues with her eyes. She had no speech impediments normally. She stated she took blood pressure medication and Chantix to stop smoking.

DRIVER'S STATEMENTS:

She did not take any illegal drugs or smoke any marijuana. She had no medical issues such as diabetes or seizures. I explained my concerns to Michelle and asked her how much she had to drink that day. She stated she had a couple glasses of wine which she drank approximately 6 hours prior. She stated she drank in Boynton and was traveling home down Wright Drive. Michelle stated that she stopped her car to turn down her street to go home, she did not think she hit him but apparently she hit him. Michelle stated she was the only one in the vehicle at that time and she had been driving. She also advised the vehicle was registered to her and she had a valid driver's license. Based on my observations I asked Michelle to submit to standardized field sobriety tasks which she stated she would do. I then moved with Michelle to the I-95 overpass where the ground was dry. Michelle removed her sandals for the tasks. No forward blue police lights were on during the tasks.

ODORS:

Obvious odor of unknown alcoholic beverage on breath as she spoke.

GENERAL OBSERVATIONS

SPEECH: slurred, mush mouth, unclear

ATTITUDE: Compliant, talkative, upset

CLOTHING: Yellow tank top, gray shorts, black sandals

MEDICAL/OTHER: Stated had high blood pressure but no other medical issues (no diabetes or seizures), takes blood pressure medication and Chantix to stop smoking, no illegal drugs or marijuana taken, no physical defects or injuries, had a couple glasses of wine, no eye issues

SUBJECT PhillipsMichelleCASE NUMBER 17108557

ROADSIDE TASKS

HORIZONTAL GAZE NYSTAGMUS:

- | | |
|---|---|
| <input checked="" type="checkbox"/> LT EYE-LACK OF SMOOTH PURSUIT | <input checked="" type="checkbox"/> RT EYE-LACK OF SMOOTH PURSUIT |
| <input checked="" type="checkbox"/> LT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION | <input checked="" type="checkbox"/> RT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION |
| <input checked="" type="checkbox"/> LT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES | <input checked="" type="checkbox"/> RT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES |

Other Observations:

Michelle's eyes tracked equally, the pupils were the same size and were appropriate for the lighting conditions, and no resting nystagmus was observed. Vertical gaze nystagmus was administered and was observed. Lack of convergence was administered and was observed. Her right eye rotated up and out while her left eye remained converged. She could not keep her head still and stopped following the stimulus with her eyes, she also swayed in a circular motion and stumbled to her side while standing still, moved arms and feet.

WALK & TURN:

Michelle assisted in placing a white tape line on the ground prior to the tasks. I explained and demonstrated the instructions for the walk and turn task to Michelle who stated that she understood. During the task I observed that Michelle had the following cues: couldn't keep balance while listening to instructions (feet off line and arms up, did not get back into instructed position until after instructions completed); could not place right foot in front of left (kept it slightly off to one side); stops walking to steady self/regain balance several times; missed heel-to-toe on each step; stepped off the line on steps: 1, 8, 9 on the first set then on 3, 6 on the return; used arms for balance (raises arms over six inches); improper turn (lost balance after turning before walking, did not keep front foot on ground as instructed); took incorrect number of steps: 9 on the first set then 14 on the return; swayed in a circular motion during instructions.

ONE LEG STAND:

I explained and demonstrated the instructions for the one leg stand task to Michelle who stated that she understood. During the task I observed that Michelle had the following cues: swayed while balancing; used arms for balance (raises arms over six inches); put foot down 4 times before 30 seconds; swayed in a circular motion during instructions; task was stopped at 24 seconds due to potential for Michelle to fall.

FINGER TO NOSE:

Michelle put her sandals back on for the remainder of the tasks. I explained and demonstrated the instructions for the finger to nose task to Michelle. I explained what is considered the tip of the finger and tip of the nose to Michelle who stated that she understood and she also knew her left from her right. During the task I observed that Michelle had the following cues: did not keep eyes closed; tilted head forward; failed to return arms to the side on each instructed hand; touched bottom and below nose on 1st and 2nd instructed hand; touched side of nose on 3rd and 4th instructed hand; used pad of finger not finger tip on each instructed hand; used wrong hand for task (brought up left when called for right on 5th instructed hand then switched); swayed in a circular motion during task; did not maintain instructed position (stumbled to the side);

ROMBERG ALPHABET:

I explained and demonstrated the instructions for the Romberg with recitation task to Michelle who stated that she understood. I asked her to say her ABCs from A to Z without stopping or singing which she stated she could. She started the task then stopped because she stated she was nervous due to the cars on the road. We then repositioned and during the task I observed that Michelle had the following cues: did not keep eyes closed; incorrectly recites alphabet (stated to H then stated J, L, M, N, O, P; Q, R, S, T, U, Z, W, H, Y, Z; swayed in a circular motion.
