Probable Cause

On August 31, 2019 I was on routine patrol in my marked patrol car in Palm Beach county. I responded to the scene of a traffic stop that occurred on 10th Ave westbound west of I-95 (State Road 9). I arrived on scene and was briefed by Sgt. Handzik. She stated that she stopped the vehicle for speed violation. She then continued to state that she observed that the driver had bloodshot glassy eyes, slurred speech and the odor of an unknown alcoholic beverage was emitting from his breath as he talked. I then began to speak to the driver and I observed that he had bloodshot glassy eyes, slurred speech and the odor of an unknown alcoholic beverage was emitting from his breath as he talked. I then requested that he step out of the vehicle and walk towards my patrol car. As he stood in front of me I observed that he had an orbital sway, bloodshot glassy eyes, slurred speech and the odor of an unknown alcoholic beverage was coming from his breath as he talked. I then requested that he conduct field sobriety exercises and he agreed. The driver was later identified by his FL DL as Nicholas Palladino.

Horizontal Gaze Nystagmus

Before beginning the exercises, I checked to see if Mr. Palladino was wearing glasses or contact lenses. It was determined that Mr. Palladino was not wearing glasses. I then checked Mr. Palladino's eyes and observed equal tracking and equal pupil size. Mr. Palladino was instructed to place his feet together and place his hands down at his side. He then was instructed to keep his head still and follow the stimulus with his eyes and his eyes only. He was also instructed to keep looking at the stimulus until told not to. Mr. Palladino verbally indicated that he understood.

- Lack of smooth pursuit, left eye
- Lack of smooth pursuit, right eye
- A distinct and sustained nystagmus at maximum deviation in the left eye
- A distinct and sustained nystagmus at maximum deviation in the right eye
- An onset of nystagmus prior to 45 degrees in the left eye
- An onset of nystagmus prior to 45 degrees in the right eye

I also observed vertical nystagmus. I observed the angle of onset to be 45 degrees.

During the exercise Mr. Palladino had to be told to stay in the proper position and not to move his head during the exercise. I also observed Mr. Palladino to have orbital sway and glassy red eyes.

Walk and Turn Exercise

The area was level and free of debris. Mr. Palladino verbally indicated that he saw the line on the ground. Mr. Palladino was instructed to put his left foot on the line, then place his right foot on the line

ahead of the left foot in a heel to toe manner. I then demonstrated this position. Mr. Palladino was instructed not to begin untold to do so. Mr. Palladino verbally indicated that he has understood all instructions up to this point. Mr. Palladino was then instructed to take 9 heel to toe steps on the line when told to do so. I then demonstrated this. Mr. Palladino was then instructed to turn on the ninth step and to keep the front foot on the line and to take a series of small steps with the foot on the line. I then demonstrated this for Mr. Palladino. Mr. Palladino was also instructed to keep his arms at his sides and to watch his feet during the exercise. Mr. Palladino was also instructed to count aloud and to not stop once he begins the exercise. He was also instructed to keep his arms at his sides at all times.

He was unable to stand in the instructional position as instructed. He took 9 steps forward and missed heel to toe on multiple steps. He completed the turn incorrectly by taking both feet off the line and pivoting on his foot. He then took 9 steps back and missed heel to toe on multiple steps.

One Leg Stand Exercise

Mr. Palladino was instructed to stand with his feet together and to place his arms down at his side. Mr. Palladino was instructed to maintain that position until told to do so. Once told to do so, Mr. Palladino was instructed to raise one foot approximately 6 inches off the ground and to keep both legs straight with both arms at his side. He was also instructed to look at the elevated foot and count aloud in the manner of one thousand-one, one thousand-two and so on until told to stop. Mr. Palladino verbally indicated that he understood the instructions after I demonstrated to him.

Mr. Palladino was told to begin and raised his left foot. During the exercise Mr. Palladino displayed an orbital sway. Mr. Palladino did not look down at his foot during the exercise and he placed his foot down.

Finger To Nose

Mr. Palladino was instructed stand with his feet together and arms at his side and to have his index fingers pointed out. He was instructed to not start and stay in that position until told to do so. He stated that he understood. I then demonstrated the position. Mr. Palladino was then instructed to when told to start to close both eyes and tilt his head back. When told to do so he was instructed to bring the hand I directed upward, touching the tip of your finger to the tip of his nose. I then demonstrated this. He was then instructed to after touching the tip of the nose to immediately bring his hand down to his side. He stated that he understood. I then demonstrated and he stated that he understood. He was instructed to raise his hand in the following order, left, right, left, right, and right, left.

- Left: Missed. Pad
- Right: Missed. Pad
- Left: Missed. Pad
- Right: Missed. Pad
- Right: Missed. Pad

-Left: Missed. Pad

Modified Rhomberg Balance

During the exercise he was instructed to stand with his feet together and hands at his side. He was told to estimate the passage of 30 seconds in His head with His eyes closed and head tilted back. He was instructed that when he was done estimating to open his eyes and say "Stop."

He began the exercise and I observed that he had a 3-inch sway in all directions. He stopped the exercise after 14 seconds and stated that he counted to 30 as instructed. He counted aloud to 45 and stopped.

He was then placed under arrest for DUI and secured inside my patrol car. He was then transported to the county jail. Once I arrived at the testing facility I conducted a 20-minute observation. At no time did he regurgitate or take anything by mouth. I then requested that he provide a lawful sample of his breath and he agreed. He provided a sample at .031 and .028. I then requested for a lawful sample of his urine and refused. Implied consent was read and he stated that he understood. He then refused to provide a sample again. He also refused to sign the citation.

The above incident occurred in Palm Beach County.
