PROBABLE CAUSE STATEMENT

The undersigned certifies and swears that he/she has just and reasonable grounds to believe, and does believe that the above named Defendant committed the following violation of law
The Person taken into custody

[x] committed the below acts in my presence
[ ] confessed to _____ admitting to the below facts
[ ] was observed by _____ who told _____ that he/she saw the arrested person commit the below acts.
[ ] was found to have commited the below acts, resulting from my (described) investigation

On the 27TH day of DECEMBER 20 18 at 1950 [ ] A.M [x] P.M. (Specifically include facts constituting cause for arrest)

On Thursday 12/27/2018 at approximately 1950 hours I was patrolling the area of Okeechobee Blvd and Jog Road in unincorporated West Palm Beach, in Palm Beach County Florida, 33411. While in the in the westbound lane of Okeechobee Blvd to turn south on Jog road, I was behind a black Mercedes Benz E350 wagon (bearing FL tag Y04VYA). When the light turned green to turn south on Jog, the black wagon did not move and stayed in place for approximately 10 seconds.

After the wagon began to drive south on Jog, it was traveling at a slow speed in the inside lane causing traffic behind me to go around the wagon. When I drove around the wagon, I could see that it had front end damage on the passenger side and the front passenger side headlight was out. I then heard another deputy on the radio say that he was unable to locate a black car that was involved in a crash at Okeechobee Blvd and Indianan that had left the scene. When I gave PBSO dispatch the license plate they stated that was the same car that left the scene.

I attempted to stop the wagon at Jog and Belvedere Road as it was traveling south on Jog. When I turned on my red and blue over headlights on to do a traffic stop, the wagon failed to stop and continued south on Jog at approximately 25 miles per hour. The wagon then stopped at the red light at Jog and Southern. I pulled in front of the car as it was stopped at the light and turned on my rear over lights on.

When I got out of the car to make contact with the driver (later identified as Richard Allenson with his Florida driver's license) he stared at me through his driver side window without any expression. I asked Richard to roll down the window and instead, he opened the door. I asked Richard why he did not stop for me when I had my lights and sirens on and he told me that he didn't think I was trying to stop him and that he thought I was trying to stop someone else.

When I asked about the damage on his front passenger side and if he was in an accident, he stated that he didn't believe he hit anything. I then asked if he has ever been in an accident before and he told me, no, but then stated that he has been rear-ended a few times. While speaking with Richard I could smell the obvious odor of an unknown alcohol beverage coming from his breath. When I asked where he was coming from Richard told me that he was coming from a restaurant. I asked if he had anything to drink at dinner and he told me that he had two glasses of wine. I then asked Richard where he was going and he told me that he was going home.

Based on all of these observations, I requested a PBSO DUI car to respond to the scene. Once investigator Soriano ID# 9418 arrived on the scene, I informed him of my findings and the investigation was turned over to him.

SUBJECT: ALLENSON RICHARD D CASE NUMBER: 18160301

AGENCY: PALM BEACH COUNTY SHERIFF'S OFFICE ARRESTING OFFICER: Corporal R Soriano

PERSONAL CONTACT

DRIVING PATTERN: ACTUAL PHYSICAL CONTROL (PHYSICAL EVIDENCE OR STATEMENTS PUTTING DEF. BEHIND WHEEL OF VEHICLE)

On Thursday, December 27, 2018 at approximately 19:56 hours, I responded to a traffic stop located at the intersection of Southern Blvd (State Road 80) and N Jog Road in unincorporated Palm Beach County in regards to a possible impaired driver which was involved in a vehicle crash where he left the scene. Upon my arrival, I observed a black Mercedes Station wagon E350 bearing Florida tag "Y04-VYA" with damage to the right headlight area. There was a patrol car with its emergency lights activated parked in front of the Mercedes and one parked behind it. Upon exiting the vehicle, I met with Deputy Alaste who told me the following, "I was patrolling the area of Okeechobee Blvd and Jog Road in unincorporated West Palm Beach, in Palm Beach County Florida, 33411. While in the in the westbound lane of Okeechobee Blvd to turn south on Jog road, I was behind a black Mercedes Benz E350 wagon (bearing FL tag Y04VYA). I attempted to stop the wagon at Jog and Belvedere Road as it was traveling south on Jog. When I turned on my red and blue over headlights on to do a traffic stop, the wagon failed to stop and continued south on Jog at approximately 25 miles per hour. The wagon then stopped at the red light at Jog and Southern. I pulled in front of the car as it was stopped at the light and turned on my rear over lights on

When I got out of the car to make contact with the driver (later identified as Richard Allenson with his Florida driver's license) he stared at me through his driver side window without any expression. I asked Richard to roll down the window and instead, he opened the door. I asked Richard why he did not stop for me when I had my lights and sirens on and he told me that he didn't think I was trying to stop him and that he thought I was trying to stop someone else.

I then asked Richard where he was going and he told me that he was going home.

Based on all of these observations, I requested a PBSO DUI car to respond to the scene."

OBSERVATION OF DRIVER:

I then approached the vehicle on the driver side and made contact with the driver, who I identified by his valid Florida driver's license as Richard Douglas Allenson. I observed Allenson was wearing light blue jean pants and blue collar shirt. While questioning Allenson, I observed that he seemed to be confused by my questions when I asked him if he knew why he was being stopped. I observed Allenson's eyes appeared red and glossy. I observed that he was slurring his words. Allenson was asked to exit the vehicle so that I could talk to him about tonights incident. Upon exiting his vehicle, I observed that Allenson was having difficulty balancing and swaying once he stood in front of my vehicle. I explained to Allenson that I wanted to talk to him about a vehicle crashin involving him in the City of West Palm (20180021572). Allenson agreed and I read him his constitutional warnings. Once Allenson understood, I proceeded to ask him questions. he told me he was heading home from a restaurant and ran onto a median and struck a sign. He stated he did not have any damage on his vehicle. I then walked him to the front of his vehicle and showed him the damage to the front passenger side and his reaction was in shock. He could not believe the damage the car sustained. I then escorted him back to the front of my vehicle and explained to him that I was not investigating the crash and was conducting a separate investigation for DUI. I explained to Allenson the totality of all the information provided and his driving pattern, Deputy Aliseo was under the suspicion he may have had too much of an unknown alcoholic beverage which may have impaired his ability to operate a motor vehicle safely. I asked Allenson if he would be willing to perform field sobriety tasks which he agreed to.

DRIVER'S STATEMENTS:

I asked Allenson if he had been drinking or used any drugs and he stated he had two glasses of wine. I asked Allenson if he had any medical problems and/or previous injuries and he answered "no." I asked Allenson if he wore any glasses or contacts to correct his vision and once again answered "no." I asked Allenson if he takes any medications and he answered "no."

ODORS:

Obvious odor of an unknown alcoholic beverage

ROADSIDE TASKS

HORIZONTAL GAZE NYSTAGMUS:

- [x] RT EYE-LACK OF SMOOTH PURSUIT
- [x] LT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION
- [x] RT EYE-DISTINCT & SUSTAINED NYSTAGMUS AT MAX. DEVIATION
- [x] LT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES
- [x] RT- EYE-ONSET OF NYSTAGMUS PRIOR TO 45 DEGREES

Other Observations:

Once positioned in the front of my vehicle, I continued my investigation. I instructed Allenson to keep his hands by his side, stand with his feet together, and follow a red light stimulus with his eyes not turning his head. I asked him if he understood my instructions. Once Allenson verbally stated he understood my instructions the HGN task was performed. Allenson could not maintain both his feet together and would sway while standing stationary. I observed both eyes to be red, bloodshot, and glossy. His left and right eye displayed equal pupil size, equal tracking, and a lack of smooth pursuit. I observed distinct and sustained nystagmus was present in both his left and right eye at maximum deviation during two separate four second evaluations. The onset of nystagmus was prior to a 45 degree angle in both his left and right eye during two separate four second evaluations. Vertical nystagmus was not present in both the left and right eye during two separate four second evaluations. While conducting the task I had to remind him to keep hands by his side, not turn his head and to follow the stimulus multiple times.

WALK & TURN:

I positioned Allenson on a painted white line which was on a smooth and level surface. The surface was free of any debris and well lit by the headlights on my vehicle. I instructed Allenson to place his left foot on the white line and place his right foot in front of his left touching heel to toe. I instructed him that he was to keep his hands by his and stay in the position until given further instruction. As I was attempting the walk and turn task, it began to down pour with heavy rainfall. I relocated Allenson to underneath a nearby overpass (State Road 80) and relocated out of the weather. Once underneath the overpass, I placed a yellow line created using yellow duct tape, which was on a smooth and level surface, free of any debris and well lit by the headlights on my vehicle. I instructed Allenson to place his left foot on the line and his right foot in front of the left touching heel to toe. I instructed him that he was to keep his hands at his side and stay in this position until I instructed him to do otherwise. Once placed into the instructed position, I explained and demonstrated the rest of the task. During the task, I observed Allenson swayed while balancing, started too soon and would not wait for me to finish explaining the task. Allenson was given the instructions twice and both times he started too soon before I finish explaining. Allenson stops walking to steady self, did not touch heel to toe, stepped off the line, used arms to maintain balance (+6"), did not turn properly and took incorrect number of steps.

ONE LEG STAND:

I placed Allenson with his feet together and arms at his side. Once Allenson was placed into the instructed position, I explained and demonstrated the one leg stand task. Once Allenson stated he understood, the task was performed. During the task, I observed, Allenson could not maintain the instructed position, he started too soon and swayed heavily while standing stationary. While raising his foot he put foot down three times within 30 seconds and was stopped due to possibility of him falling and getting injured

FINGER TO NOSE:

Once positioned in the front of my vehicle, I continued my investigation. I instructed Allenson to keep his hands by his side, stand with his feet together, and follow a red light stimulus with his eyes not turning his head. I asked him if he understood my instructions. Once Allenson verbally stated he understood my instructions the HGN task was performed. Allenson could not maintain both his feet together and would sway while standing stationary. I observed both eyes to be red, bloodshot, and glossy. His left and right eye displayed equal pupil size, equal tracking, and a lack of smooth pursuit. I observed distinct and sustained nystagmus was present in both his left and right eye at maximum deviation during two separate four second evaluations. The onset of nystagmus was prior to a 45 degree angle in both his left and right eye during two separate four second evaluations. Vertical nystagmus was not present in both the left and right eye during two separate four second evaluations. While conducting the task I had to remind him to keep hands by his side, not turn his head and to follow the stimulus multiple times.

ROMBERG ALPHABET:

I verbally inquired Allenson could recite the entire English alphabet. He stated he was able to recite the English alphabet and I instructed him to place his feet together with his arms at his side and stay in this position until told to do otherwise. I instructed him that upon starting he was to tilt his head back approximately 45 degrees and close his eyes. He would begin to state the alphabet in a slow and methodical manner without singing or rhyming it. I asked him if he understood the instructions and he verbally replied he understood. During the instructions he continued to sway while standing stationary. I instructed Allenson to start the task as explained. During the task, I observed the Allenson did not keep eyes closed, swayed more than (+2") from side to side, from front to back, used arms for balancing.
